

Accessory Products

Pyroclear® Accessory Products

Pyroclear® brand accessory products are the first products in the industry that are certified to be free of interfering endotoxin and (1→3)-β-D-glucan contamination. Pyroclear brand certified products include depyrogenated test tubes, 96-well microplates, pipette tips and LAL Reagent water. These products are designed to reduce Out of Specification (OOS) investigations due to contaminated accessories.

Glucashield®

(1→3)-β-D-Glucan Inhibiting Buffer - Reconstitution Products

Glucashield® buffer is used to reconstitute LAL and render the reagent insensitive to (1→3)-β-D-glucan interference by effectively blocking the Factor G pathway of the endotoxin clotting cascade.

Pyrosol® LAL Reconstitution Buffer

Reconstitution Products

Pyrosol is an FDA licensed buffer for reconstituting Pyrotell® multi-test or Pyrotell®-T lysate.

[VIEW PRODUCT](#)

LAL Reagent Water (LRW)

Reconstitution Products

LRW is specially processed water intended for reconstitution of LAL reagents and CSE, and to dilute samples and standards for LAL assays.
