

PAYMENT INTEGRITY (PI)

Optimizing claims management to maximize savings

Allied is focused on making certain our clients never pay more than necessary. Before a payment is ever made, our system – through use of audits and one-of-a-kind claims editing software – pinpoints provider inaccuracies, waste, and abuse.

Blending Advanced Tools + Expert Knowledge

To maximize savings, health plans require the right technology partner, one with health care expertise, dedicated resources, and analytics built from extensive data repositories. By combining our cutting-edge, machine learning-enabled technology with superior clinical expertise and data, Allied's Payment Integrity platform decreases costs by 7%^{*}. *Based on Allied's 2019 Book of Business

ALLIED DECREASES CLIENT CLAIM COSTS BY 7%*

How Allied's Review Process Works:

1. Pre-Claim Adjudication:

First, claims are submitted through Allied's Enterprise Core Administration system using a stateof-the-art claim editing software that analyzes claims and identifies billing and coding errors. Next, expert physicians and nurses perform an additional review to target complex issues such as contradictory or overlapping services and suspected billing patterns not addressed by published edits and policies alone. With this two-fold process, Allied successfully combines automated clinical editing tools with expert clinical review, reducing overall medical spend while improving payment accuracy.

2. Post Claim Adjudication (Itemization Bill Review):

Allied's Itemization Bill Review includes a clinical evaluation and comparative analysis of itemized billing statements against national client payment standards. This comprehensive forensic solution reviews charge utilization, appropriateness of charges, and billing behavior to verify proper payment for claims.
