

Meet the Application Services Team

These are some of the more than 50 Fresche experts who can help you solve all your IT needs:

Experience:
38 y+

<https://ca.linkedin.com/in/ken-robertson-61b0292>

Ken Robertson

Senior Solutions Architect

Passionate about computers since he was president of his high school's computer club, Ken's career went from working on real-time microcomputers, IBM mini and mainframes, through the gamut of HP, Solaris, Tandem, Univac, DEC, Intel, and Unix systems, to his current work with IBM i. At Fresche, Ken trains customers to help them understand and make the most of the X-Analysis suite. In his spare time, he likes to play jazz and folk music. He rocks the guitar at open-mic jams.

Experience:
20 y+

<https://www.linkedin.com/in/robert-arce-638633b>

Robert Arce

IBM i Subject Matter Expert

Robert chose his career in IT at the age of 13 - and his passion for computers persists to this day. His long experience with the IBM i includes working with RPG, SQL, CL and C#, but designing databases is his main expertise. He is also an expert in the X-Analysis suite for application analysis and mapping. He is an active member and President Emeritus of the Dallas/Fort Worth Metro Midrange Systems Association and loves to help people and companies achieve their best.

Experience:
13 y+

Sheela Mysore Srinivasa Murthy

RPG, COBOL and DB2 Developer

Sheela's career has been entirely focused on mainframes and the IBM i. At Fresche, she uses her COBOL, RPG, JCL and DB2 skills to maintain and support customers' IT systems. Sheela loves that IT is such an innovative industry, where she's always learning new things. She spends her free time drawing, painting, and playing chess with her daughters.

Experience:
30 y+

Larry Watt

Programmer and Analyst

With over 30 years of experience developing applications in COBOL and Powerhouse 4GL, Larry is a big fan of the IBM i, RDi and Fresche's X-Analysis suite. He was first converted to the IT world by a high school Philosophy teacher who introduced him to the concept of logic using a Texas Instruments "programmable" calculator.

Experience:
30 y+

Trevor Perry

IBM i Modernization Strategist

Trevor started his career as a System/38 consultant in 1983 and has been working with IBM i and its predecessors since. He now advises companies on setting IT strategies and making the most of their IBM i to achieve business goals. He's an expert in IT strategy, application modernization and SOA. He's also well known in the IBM i community as a speaker and lead promoter of modernization efforts.

Experience:
32 y+

Mark Burdick

IBM i Systems Analyst

Mark is a veteran of several IBM midrange systems and has extensive development experience. He's knowledgeable in project management and system development lifecycles, and currently uses his skills to support one of Fresche's customers with its IT security and system migration planning. Mark is a fan of escape games, magic, and finding the perfect solution to a customer's challenge.

Meet the Application Services Team

These are some of the more than 50 Fresche experts who can help you solve all your IT needs:

Experience:
23 y+

Robert Rheault

Director of Application Services

Rob has dedicated his career to the IBM i series since his time at IBM. At Fresche, he is responsible for coordinating a team of IBM i specialists who work with customers to maintain, enhance and evolve their applications in order to meet business demands. Rob has been fascinated by computers since he was 10, but also enjoys running, cross-country skiing, and playing badminton with his daughters.

<https://ca.linkedin.com/in/robert-rheault-42341429>

Experience:
20 y+

Leo Lymberopoulos

Manager of Application Services

Leo started his IT career as a developer and gradually moved to project management, where he combines his IT skills with a passion for working with people. At Fresche, he helps manage Application Services engagements and also standardizes processes for scalability and efficiency. On the weekends, you'll find him at a hockey arena, coaching a minor league team or skiing with his family.

<https://ca.linkedin.com/in/leolyMBERopoulos>

Experience:
32 y+

Steve Miller

Application Specialist

Throughout his career, Steve has worked with many different operating systems and languages. He is a COBOL expert and his experience includes designing applications and managing large-scale development projects. He works on site at one of Fresche's customers and helps manage our Application Services team. He's an experienced traveler and has been to 48 US states, seven Canadian provinces and a total of nine countries.

Experience:
30 y+

Mark Mahoney

Application Specialist/ System Support

Mark's experience includes working in hardware planning and maintenance and in production control before eventually moving to technical support. That's when he learned legacy languages like Powerhouse, COBOL and RPG. His IBM experience includes the B36 and the IBM i (AS/400). When he is not working as the AES administrator for one of Fresche's customers, he likes fishing and open-water diving. His motto is "There is always a way!"

Experience:
25 y+

Martin Beland

Senior IBM i Analyst

The IBM i has been the focus of Martin's entire career, and he has worked with many Fortune 100/500 companies to help them meet their ever evolving business needs. His in-depth expertise with technology standards and best practices makes him an invaluable addition to any IBM i team. Martin's positive attitude translates well into his favorite quote: "Smile... It confuses people!"

Experience:
30 y+

Richard Courey

Senior COBOL Developer

Richard uses his strengths in application development on Linux and other platforms to analyze and troubleshoot, giving customers peace of mind that their legacy applications are in good hands. He loves developing and testing bullet-proof code and is also a music enthusiast, having taken seven years of classical lessons while growing up; he plays the piano and keyboards.

Application Services

IBM i Skills and Experience

We are a North-American company offering competitive-to-offshore rates, making I.T. affordable.

The Challenge:

Finding skilled, knowledgeable IBM i resources can be tough. So how do organizations tackle backlog, address new development and get the most value from their IBM i applications?

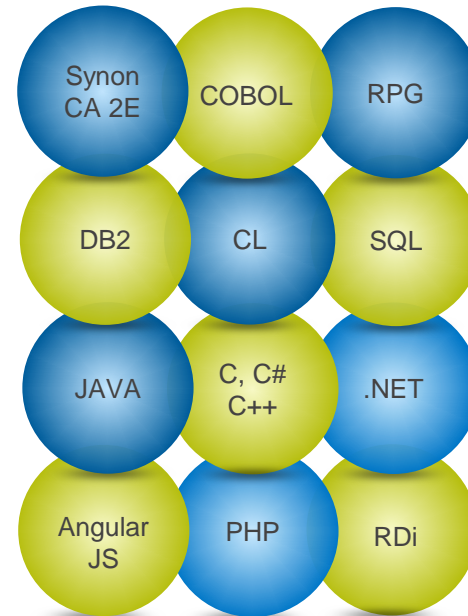

The Solution:

They take advantage of **experienced** Fresche resources, many of whom have 20+ years with languages and databases that run on IBM i (AS/400). Our team of over 50 specialists is proficient in RPG, COBOL and Synon, as well as modern languages and IT best practices.

You can count on our team to:

- Quickly learn your applications
- Analyze and implement change
- Reduce development and maintenance costs
- Improve maintainability and code quality
- Increase productivity by implementing better processes and procedures
- Ensure business continuity
- Be a true extension of your IT team

Core Expertise

A Few Key Services

- Application development & testing
- Staff augmentation, supplemental staff
- Test planning & testing
- Application enhancements: eliminating IT backlog
- Application support: break/fix
- Project scoping
- Technology integration services
- Application strategy & roadmap
