

Reduce insurer quote time to minutes with Applied Benefits Designer®

The Applied Benefits Designer, formerly the Dynamic Plan Designer of Dynamis, automates the insurer quoting process, drastically reducing the time needed to obtain quotes.

The Affordable Care Act of 2010 reduced the profitability opportunity for brokers who worked with small groups. With the introduction of adjusted community rating, a simple quote that had only a few rates before turned into an extensive process that includes dozens or even hundreds of pages. Brokers require a way to automate the quoting process for these groups, reducing time and money spent on these manual processes.

Brokers can then model medical, prescription drug and ancillary plan design options with the client in real-time to reach a quick and confident decision.

The Applied Benefits Designer's Quoting Engine provides your agency with:

- A single source to manage and upload an employee census into the system
- Instant rating from all desired carriers
- The ability to select the preferred rates to quickly generate a proposal

Enables your agency to

- Increase profitability with small group businesses
- Have more productive, face-to-face conversations with clients
- Manage renewals more efficiently

Why Applied?

Applied Systems is the leading global provider of cloud-based software that powers the business of insurance.

Recognized as a pioneer in insurance automation and the innovation leader, Applied is the world's largest provider of agency and brokerage management systems, serving customers throughout the United States, Canada, the Republic of Ireland, and the United Kingdom.
