DocAve Overview

The award-winning DocAve family of products addresses the need for fast, flexible, and real-time data protection, administration, compliance, migration, reporting, and storage optimization support for your Microsoft® SharePoint® deployments. With DocAve you can protect, manage, and optimize individual SharePoint farms or multiple farms from a single, user friendly, web-based console. Full integration of all components enables DocAve to support organizations as they continue to evolve in their usage of SharePoint.

The DocAve family of products serves a variety of business-critical SharePoint functions. DocAve will seamlessly transition your organization to Microsoft SharePoint 2010 from prior versions of SharePoint or even various legacy data platforms, while at the same time intelligently protecting your mission-critical data, including full-farm backup of customizations such as the GAC, IIS, and SharePoint Hive in order to satisfy the most stringent SLA's. You can also ensure efficient platform management and iron-clad governance with DocAve's automated deployment management, centralized user and platform administration, and robust reporting functionality.
