

# DISCOVERY AND TECHNOLOGY SERVICES

Berkeley Research Group's Discovery and Technology Services group advises law firms and corporate clients in eDiscovery, digital forensics, and investigations.

## *eDiscovery*

Subject-matter experts with years of strategic and practical hands-on experience in legal departments and courtrooms advise on the guidance and scalability clients need to implement best practices, integrate business departments, and meet tight deadlines.

- Litigation project management
- Discovery program assessment and development
- Independent technology selection and implementation
- Data mapping and document retention
- Appropriate policies, procedures, and guidelines
- Expert and 30(b)(6) testimony
- Court-appointed neutral (discovery dispute resolution)

## *Digital Forensics and Investigations*

Experienced in the courtroom and the server room, BRG forensics experts have been engaged in over 500 investigations; have provided hundreds of sworn testimonies in federal and state courts, arbitration, and deposition; and have served as third-party and court-appointed neutral experts.

- Computer forensics
- Corporate investigations
- Mobile forensics
- Managed Investigation Services (MIS)
- Internal Forensics Assessment (IFA)
- Metadata analytics
- Trade secret theft analysis
- Log analysis
- Corporate espionage and data intrusion

## *Structured Data Analytics*

From legacy document management systems to financial databases, BRG experts advise clients on understanding, accessing, retrieving, aggregating, and analyzing data and documents.

- Collection and mining
- Consolidation of disparate data sources
- Analytics and reporting
- Database production
