

NetAdvantage®

Data Visualization Silverlight

Empower your users with the information they need to make key business decisions.

Business needs are evolving in a highly competitive world. They need the ability to visualize data in a useful and interactive format for dashboards and Key Performance Indicators (KPIs). Silverlight is such a highly visual environment that it lends itself naturally to data charts and gauges that translate business data into easy-to-read, actionable information.

NetAdvantage for Silverlight Data Visualization is tailored for companies focused on the unique needs of high-end data visualization controls and components.

Infragistics enables you to build next-generation RIAs with Silverlight that

- ▶ Improve the end users' experience
- ▶ Lower cost of application distribution and maintenance
- ▶ Introduce animation and other multi-media features
- ▶ Empower your users with knowledge they can use

Get the power to enhance the user experience of workers in every business scenario.
