The most complete set of UI controls for **Line of Business applications built specifically for Silverlight 3**

Get the fastest and most powerful Silverlight Grid available! This grid delivers an expansive set of tabular hierarchical grid features that allow end users to view, search, arrange and manipulate data in ways that mimic Excel behaviors, all while maintaining a high level of performance.

Add to that a complete array of UI controls that developers are familiar with using such as charts, trees, menus and dialog windows, plus controls that embody the capabilities of Silverlight 3 such as Tile Views and Tag Clouds, and you've got everything you need to build a next generation UI now.

We're here to support developers during this crucial technology shift. Check out our new community site and forums to learn and connect you with your peers. Our experts are in support chats and discuss the questions you have around Silverlight 3. We also offer support, services, On-Demand and On-Site Training and User Experience consulting.
