

North American Faculty

Cynthia Burch, MS, MPH, CAISS

Cindy began her career at the National Study Center for Trauma & EMS (NSC) in 2001 and works on the Crash Outcome Data Evaluation System (CODES) and the Crash Injury Research and Engineering Network (CIREN) projects previously funded by the National Highway Traffic Safety Administration (NHTSA). She also works closely with the Maryland Department of Transportation - Highway Safety Office on data analyses and traffic records, facilitates the State Traffic Records Coordinating Committee (TRCC), serves as the data coordinator for the Maryland Strategic Highway Safety Plan (SHSP), conducts and analyzes the annual observational seat belt study, serves as an analytical resource for the Maryland Institute for Emergency Medical Services Systems, and answers data requests from state and local agencies as well as the public at large. She now serves as a Senior Epidemiologist at the NSC, a facilitator and assessor for Traffic Records Assessments at Traffic Safety Analysis Systems & Services (TSASS), an assessor for Occupant Protection and Impaired Driving Assessments.

Cindy has been AIS faculty since 2015 and is currently a member-at-large on the AIS Certification Board.
