

*Clearly Focused on
Improving Vision*

You are focused on healing. We are focused on supporting you.

BioDOptix™ is a dehydrated, extracellular membrane allograft derived from human amniotic tissue that is intended for homologous use as a scaffold for ocular tissue repair and regeneration.

PERFORMANCE

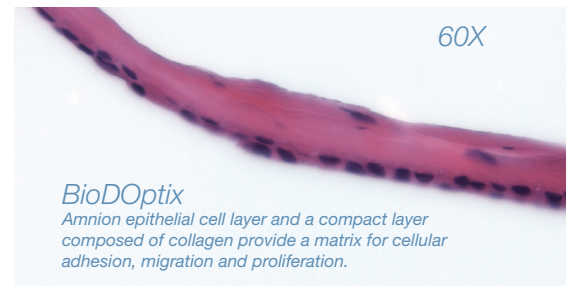

- Dehydrated using our patent-pending DryFlex® processing technology to optimize the handling characteristics and maximize the retention of the growth factors, cytokines and collagens inherent in the amnion tissue
- Adheres well to sclera and conjunctiva when placed on the ocular surface
- Placement generally does not require sutures or glue
- Allograft typically incorporates into tissue in 4-7 days

CONVENIENCE

- Circular or rectangular sizes for optimal fit
- Dehydrated product allows for easy trim-to-size fitting
- Stored at room temperature with a shelf life of 2 years
- Convenient for use in inpatient, outpatient or clinic settings
- No advance ordering or preparation required

CONFIDENCE

- Amniotic tissue is immune-privileged and rarely evokes an immune response in the human body
- Tissue recovered from live, healthy donors during cesarean childbirth
- Donor selection, tissue recovery and processing protocols and procedures meet or exceed all applicable industry standards to ensure patient safety
- Safe, natural alternative to cadaveric derived products

- Amniotic extracellular matrix composition of collagen, elastin, fibronectin and proteoglycans provides a natural scaffold to facilitate cellular adhesion while assisting cellular migration and proliferation.
- Amniotic tissue reduces inflammation and pain, scar tissue formation and the risk of infection.

Clinical Applications & Procedures

- Ocular Surface Disorders
- Corneal Epithelial Defects
- Corneal Ulcer
- Adjunctive Therapy for PK Cornea Transplant
- Pterygium
- Band Keratopathy
- Bullous Keratopathy

BioDOptix

PRODUCT ID	SIZE
OX-010152	1.5 x 2.0cm ²
OX-010203	2.0 x 3.0cm ²
OX-010012	12.0mm disc
OX-010015	15.0mm disc

BioDOptix is regulated by the FDA under 21 CFR Part 1271 and Section 361 of the Public Health Service Act.
