ECOLOGY AND ANTHROPOLOGY IN TANZANIA

Arusha, Tanzania
with extended excursions
throughout the country

One North College Street Northfield MN 55057 (507) 222-4435

global@carleton.edu

go.carleton.edu/engage

Carleton is a top liberal arts college celebrated for its academic excellence and outstanding undergraduate teaching.

STUDY AND CONDUCT RESEARCH IN TANZANIA'S MOST RECOGNIZED ECOLOGICAL AND PALEOANTHROPOLOGICAL SITES

Learn Swahili, live with a host family, explore national parks, and conduct field research in local villages and in Tanzania's national parks and natural areas.

Carleton College is pleased to take over direction of the Ecology and Anthropology in Tanzania study abroad program developed by Associated Colleges of the Midwest (ACM). Carleton continues the program's dual focus on cultural immersion and undergraduate research in northern Tanzania.

COURSES

- Introduction to Swahili Language
- Ecology of Tanzanian Ecosystems
- Physical and Cultural Anthropology of East Africa
- Research Methods and Independent Research Project

CREDITS

Carleton College awards students the equivalent of 16 semester credits.

APPLICATION DEADLINE March 15

FALL

ECOLOGY AND ANTHROPOLOGY IN TANZANIA

Arusha, Tanzania with extended excursions throughout the country

The history and landscape of northern Tanzania make this region a natural for hands-on study in anthropology and ecology. Using the Training Centre for Development Cooperation (MS TCDC) on the outskirts of Mount Meru as its base, the program makes excursions to local villages and national parks in the surrounding areas. Homestays with families in Usa River introduce students to the people and traditions of the region. During the safari and field research periods, students live in tents at local campsites.

LOCATION

The program is based at the Training Centre for Development Cooperation (MS TCDC) on the outskirts of Mount Meru, 18 kilometers east of Arusha, Tanzania. MS TCDC is ideally situated for excursions to Ngorongoro Crater, Lake Manyara, Tarangire and Arusha National Parks.

COURSES

- Introduction to Swahili Language
- Ecology of Tanzanian Ecosystems
- Physical and Cultural Anthropology of East Africa
- Research Methods and Independent Research Project

One North College Street Northfield MN 55057 (507) 222-4435 global@carleton.edu

go.carleton.edu/engage

Carleton is a top liberal arts college celebrated for its academic excellence and outstanding undergraduate teaching.

LANGUAGE

Content courses are conducted in English. Enrollment in the Swahili language course is required, however no previous study of the language is required.

FIELD RESEARCH

Participants spend three weeks collecting data in the field for their independent study projects. Field research projects build on earlier coursework and can be in either ecology or anthropology.

CREDITS

Carleton College awards students the equivalent of 16 semester credits.

LEADERSHIP

The faculty director, a member of the faculty at Carleton College, has administrative and academic responsibility for the program. Faculty associated with the Training Center for Development Cooperation (TCDC) teach some courses and advise on field research projects.

APPLICATION DEADLINE

March 15
