

Managing your growth every step of the way.

StoreEnterprise™

Multiple Facilities.
One Software Solution.

SE

Key Features

- Centralized data and open architecture for enhanced workflow.
- Seamless website, call center, payment processor and kiosk integration.
- Consolidated reports available to your entire organization.
- Yield Plan, Centershift's unparalleled revenue management tool, provides supply and demand analysis and automated rent rate agents for centralizing and managing your facility and organizational yield.
- Promotion, tracking, demographic and marketing tools.
- Optional additional services such as centralized mail processing, address verification and third-party integration to numerous industry service providers.

Your organization seems to grow larger by the day, as does your need for up-to-the-minute data. Accounting needs accurate reports, marketing needs to track their latest promotion, executives need information to make crucial decisions and investors need to see operational and financial results. And they all need it now! The answer to faster, more reliable data isn't a larger staff or a more complex system, but the proper integration of better tools. That solution is Store Enterprise.

Store Enterprise provides a high-performance, cost effective solution that improves your bottom line by maximizing your revenues and efficiency. Our centralized data and open architecture allow us to integrate Store Enterprise with other industry leading solutions, providing client-driven technology and services that enhance workflow and productivity. Our support services have set the bar for the self storage industry in terms of responsiveness and expertise.

Centershift Store Enterprise is the industry leader for large and rapidly growing organizations.

Whether you have 5 facilities or 500 facilities, Store Enterprise will completely revolutionize the way your organization succeeds.
