Unleashing the Power of SharePoint

Since 2001, AvePoint has been the leading provider of infrastructure management solutions for the industry's most popular collaboration platforms. AvePoint specializes in enterprise-strength SharePoint data protection, administration, compliance, migration, reporting, storage optimization, and SharePoint-Salesforce integration solutions. Through its award-winning DocAve family of products, AvePoint sets the standard for comprehensive, scalable, intelligent SharePoint and Salesforce infrastructure management solutions. Today, AvePoint has more than 6,000 customers worldwide, including many Fortune 500 companies.

AvePoint at a Glance

- AvePoint is a Depth Managed Gold-Certified Microsoft ISV Partner, an honor bestowed upon less than one percent of Microsoft's 30,000+ partners.
- AvePoint is a Microsoft Technology Centers (MTC) Global Alliance Partner, and Office 14 Technology Adoption Program Member (TAP).
- With headquarters, research facilities, and engineering centers in Jersey City, NJ, and wholly owned engineering centers and sales offices in San Jose, Chicago, and Washington D.C., USA; London, UK; Munich, Germany; Melbourne, Australia; Tokyo, Japan; Singapore; and Changchun, Dalian, China, AvePoint has one of the world's largest SharePoint-exclusive development teams outside of Microsoft.
- Through OEM agreements, AvePoint technologies pilot the SharePoint infrastructure management solutions of partners IBM (Tivoli Storage Manager) and NetApp (Snap Manager for MOSS).
- AvePoint was named to Deloitte's 2009 Technology Fast 500 List, received the Best of Tech-Ed Award for "Best SharePoint Product" (2008), and won the Windows IT Pro Editor's Best Award for "Best SharePoint Backup and Recovery Software" (2008).

*As with all AvePoint software, the DocAve Software Platform leverages only fully supported Microsoft methodologies and API's.

DocAve Software Platform

AvePoint's DocAve Software Platform is a robust, scalable enterprise software platform comprised of numerous integrated, independently deployable software solutions. These solutions are piloted via a unified, browser-based interface from which numerous SharePoint farms can be managed with the industry's most comprehensive suite of tools for the protection, administration, integration, and optimization of SharePoint Products and Technologies.

Administration				Data Protection	Regulatory Compliance	Migration
Management Administrator One interface to discover and manage all configurations, securities, and settings Content Manager Real-time, point-and-click movement of SharePoint content for swift reorganization Deployment Manager Automated lifecycle management of customizations and solutions, from development through production SharePoint Antivirus Comprehensive protection of SharePoint platforms from malicious content	Reporting & Testing Report Center Single-pane access to a wide variety of mission-critical data and trending statistics Monitor Real-time graphical topology of SharePoint environments, including all servers and their functions, relationships, roles, services, and system health Test Environment Creator Create and deploy complex SharePoint testing environments Usage Simulator Simulate usage to gain critical insights and optimize SharePoint performance	Replication Replicator for SharePoint Real-time one-way, two-way, and one-to-many synchronization of SharePoint content and farms Replicator for Salesforce Integration between SharePoint and Salesforce <ul style="list-style-type: none"> Content Replicator <i>Synchronization of SharePoint content to Salesforce Content Libraries</i> Data Replicator <i>Synchronization of Salesforce CRM data to SharePoint</i> 	Storage Optimization Archiver Business-rule aware archiving for optimal platform performance Extender Instantly offload BLOBs to file-based storage to optimize SQL database resources, improve performance, and increase scalability Connector Seamless connection of external content to SharePoint <ul style="list-style-type: none"> File Share Connector <i>Migration-free attachment of network and cloud file shares</i> Media Connector <i>Stream audio and video files stored on any network or cloud file share</i> 	Backup and Restore for SharePoint Intelligent item-through-platform level data protection High Availability One-switch disaster recovery solution for continuous SharePoint platform availability SiteBin Swift and complete recovery of SharePoint sites and site collections following deletion events	Vault Retain all SharePoint content in immutable form, and search with ease for total compliance Auditor Record and report upon all SharePoint events and activity Content Shield Scan all content prior to upload to ensure proactive compliance eDiscovery Search and report upon all SharePoint content for precision legal response Additional Components In crafting your compliance strategy, also consider these DocAve offerings: <ul style="list-style-type: none"> Administrator Report Center Backup and Restore High Availability 	Migrator for SharePoint Seamless, fully mapped transfer of content from legacy systems to SharePoint <ul style="list-style-type: none"> SharePoint 2001, 2003, 2007 Exchange Public Folder File Systems/Network Shares Documentum/eRoom Open Text Livelink/Vignette Lotus Notes/QuickPlace Oracle Stellent HTTP/S accessible web content
