

Credit Card Processing Hardware

Foundry POS Complete package (\$1995)

- *Samsung Galaxy 10" Tablet
- *Swivel Stand w/ Built-in Printer
- *Cash Drawer
- *VeriFone VX805 w/ EMV Reader

Optional Features

- *Bar code scanner (\$495)
- *Kitchen Printer (\$495)

This system is perfect for both retail stores and restaurants. It comes pre-loaded with your inventory or menu items. The "back office" is MCPS's own Merchant Foundry, which is a website that will track all of your business. The complete user's guide will be provided on a flash drive.

Cloud based software allows access to data anytime from anywhere, with convenient real-time reports including inventory, sales, and management.

VeriFone VX805

Foundry POS uses the VeriFone VX805 for all credit card acceptance methods including EMV, gift cards and much more.

Zoomgate

Zoomgate is a virtual terminal which can be called up on any device with Internet browser access. This terminal allows you to do credit card transactions from your device and then you can then either send an email receipt or use a printer to create one.

VeriFone VX520 Show Special (\$349)

The VX 520 is a reliable, rugged countertop device that's built to last. It handles encryption, decryption and processing at lightning speeds thanks to its powerful processor and expandable memory. Available with Integrated NFC (Near Field Contact - Contactless) capabilities support alternative payments and also supports value-added applications such as loyalty or gift card acceptance.

A full range of connectivity options, from dial to dial plus Ethernet allows the VX 520 to use the connection you choose. A uniquely designed communication port area underneath the device keeps countertops neat and free of clutter.

Delta Pay Plus

Delta Pay Plus is your mobile advantage in credit card processing. Download the "SwipeSimple" App from the App Store and process transactions in a mobile environment. Simply attach to your cell phone or tablet and begin processing.

•DeltaPay Plus offers:

- Credit and Cash Transactions
- Inventory Management
- Back Office Management
- Tip at time of sale
- Text or email receipts
- Multi-user
- Multi-merchant
- Full transaction details with signature image
- Add and edit inventory items on mobile device
- Real time syncing amongst devices and back office
