

CLOUD SOLUTIONS

INTRODUCTION

Harness the power of the cloud. Traditional datacenter models will limit your ability to keep pace with constantly changing market conditions. Increase response time, and improve business agility with cloud solutions.

As an early adopter and proven integrator of cloud solutions, IPM educates organizations on the options available, helps identify and design solutions that support business initiatives and assesses environments to ensure the power of the cloud is realized.

MOVING TO THE CLOUD

Are you planning a move to the cloud? IPM develops cloud strategies that support your business. Whether migrating on-premise systems and applications to the cloud or building a private cloud model, we are here to help.

OPTIMIZING THE CLOUD

Are you already using cloud solutions? IPM ensures you are maximizing your investment. We have expertise and best practices to help you improve end-user experience, optimize performance and simplify complex environments.

SERVICES

- Hybrid Cloud: Planning service to help you understand the landscape and identify the services and workloads ready for the cloud.
- Private Cloud: Architecture service for the design and implementation of a private cloud platform to support your business.
- Office 365: Migration service to support your transition to the Microsoft hosted platform.
- Mobility: Implementation service to leverage workspace mobility solutions for anytime, anywhere access.
