

DESKTOP TRANSFORMATION

MORE THAN JUST A MIGRATION

A Microsoft Windows migration project is more than just an upgrade or an implementation. At IPM, we view it as a transforming business opportunity to innovate how users access and interact with their desktop and applications in the office, at home or on the go.

FEATURES & BENEFITS

Feature	A lightweight core image that supports various application delivery methods to the desktop/VDI including Microsoft App-V.
Benefit	<ul style="list-style-type: none"> • Improve software and license metering and lower associated costs. • Decrease the impact on the operating system image and makes changes more streamlined.
Feature	A single desktop image for all physical or virtual devices.
Benefit	<ul style="list-style-type: none"> • Centralize desktop and device management. • Create a single channel for software distribution, deployments and testing. • Deploy repeatable processes with predictable results to all desktops and maintain accurate inventory.
Feature	A customized security model that aligns with business requirements.
Benefit	<ul style="list-style-type: none"> • Data can reside centrally with remote access to virtual PCs and eliminate the need for copying data or software.
Feature	A streamlined operational IT process.
Benefit	<ul style="list-style-type: none"> • Decrease the volume of IT tickets and increase resolution times. • Refocus IT hours on more value-add technology initiatives as MAC volume decreases. • Replace non-working PCs quicker and expedite IT on-boarding for new hires.
Feature	A consistent user experience anywhere, anytime and on any device.
Benefit	<ul style="list-style-type: none"> • Ensure all features; functionality and performance are the same across all devices.
Feature	A ready-to-support platform for physical or virtual environment in the future.
Benefit	<ul style="list-style-type: none"> • Migrate to a virtual environment when the timing is right with minimal investment.

A long-standing Microsoft Gold Certified Partner, IPM has both the in-depth product expertise and proven deployment experience that a management team can rely on to help them make informed IT business decisions. With IPM's desktop transformation approach, clients not only upgrade their operating system but they also put in place the underlying framework to personalize, manage and enhance the desktop experience easily and securely
