CALDERA

CalderaRIP V13

More effective printing in less time.

With the latest version of our award-winning RIP software, you'll discover a whole range of new and improved features that will not only help you save time across your workflow, but deliver a more streamlined operation unique to your needs. With all your favourite applications and new drivers included, now's the time to upgrade for a whole new Caldera printing experience.

An overview of the V13 changes

There's lots to appreciate in this new version – which, as always, has been developed to enhance the user experience by providing intuitive functionality for faster and more cost-effective printing.

NEW FEATURES INCLUDED

Print&Cut Mirror

For dye sublimation and backlit printing, this new feature will save up to 20% of prepress time by allowing you to mirror print and cut data directly in the RIP.

Custom Annotations

This allows users to customise the information they include in annotations rather than the legacy Caldera standard or detailed information, saving space on media and allowing for circumstances when you can't use a barcode or qrcode reader.

CalderaJobs - Detailed View

Save time by managing a clean view of your past jobs. Archive, save or delete jobs while keeping track of production with a new, faster search engine and detailed job view.

TileOrder

You can now adapt the order in which you print tiles to achieve significant onsite time savings during large tiling jobs, blueback and building wrapping.

TileOrder feature

Print&Cut Mirror feature and CalderaJobs Detailed View

AND MORE…

Adobe Textile Designer Integration

Gives you the ability to design with confidence and print with accuracy, using a single streamlined process for accurate textile print production. You'll be assured accurate pattern repeatability, with correct and consistent color management across all devices.

Alpha-to-Spot

Save up to 60% of prepress time by automatically converting transparent backgrounds to spot channels.

WE'VE ALSO IMPROVED SOME OF YOUR EXISTING FAVOURITES

CalderaJobs

Job Archiving and Job Restore allow you to reprint the same jobs for new campaigns.

CxF/4

You can minimize the time color matching takes with the ability to import Spectral Brand Colors, to select measurement conditions and to select illuminant and observer conditions.

InkPerformer

This latest version delivers savings of up to 30 percent on the previous version.

Faster downloads directly from CalderaDock

With V13, you'll be able to download new Light Installers, new ICC profiles and printer drivers.

2xCMYK Print Mode

Optimize your 2xCMYK printer using finer screening and ink optimisation on duplicated heads.
