

**When a student wants  
to be challenged...**

*Before I started Davidson, I was worried that I wouldn't have time for anything else but being online...but I have time for art class, ballet class, playing with my kitten, reading, and writing! —Elizabeth*

*Teachers really challenge us. I meet it by working extra hard and putting in extra hours.*

*—Kai*

They find their academic home at Davidson Academy Online. They find a school made for them —and made for them to thrive.

8:00-9:00AM Homework  
 9:00-9:45AM French Tutor  
 10:00-11:15AM History  
 11:30AM-12:00PM Lunch  
 12:00-1:15PM English  
 1:30-4:00PM Homework

### FRI

8:00AM-12:00PM Homework  
 12:30-1:45PM Astronomy

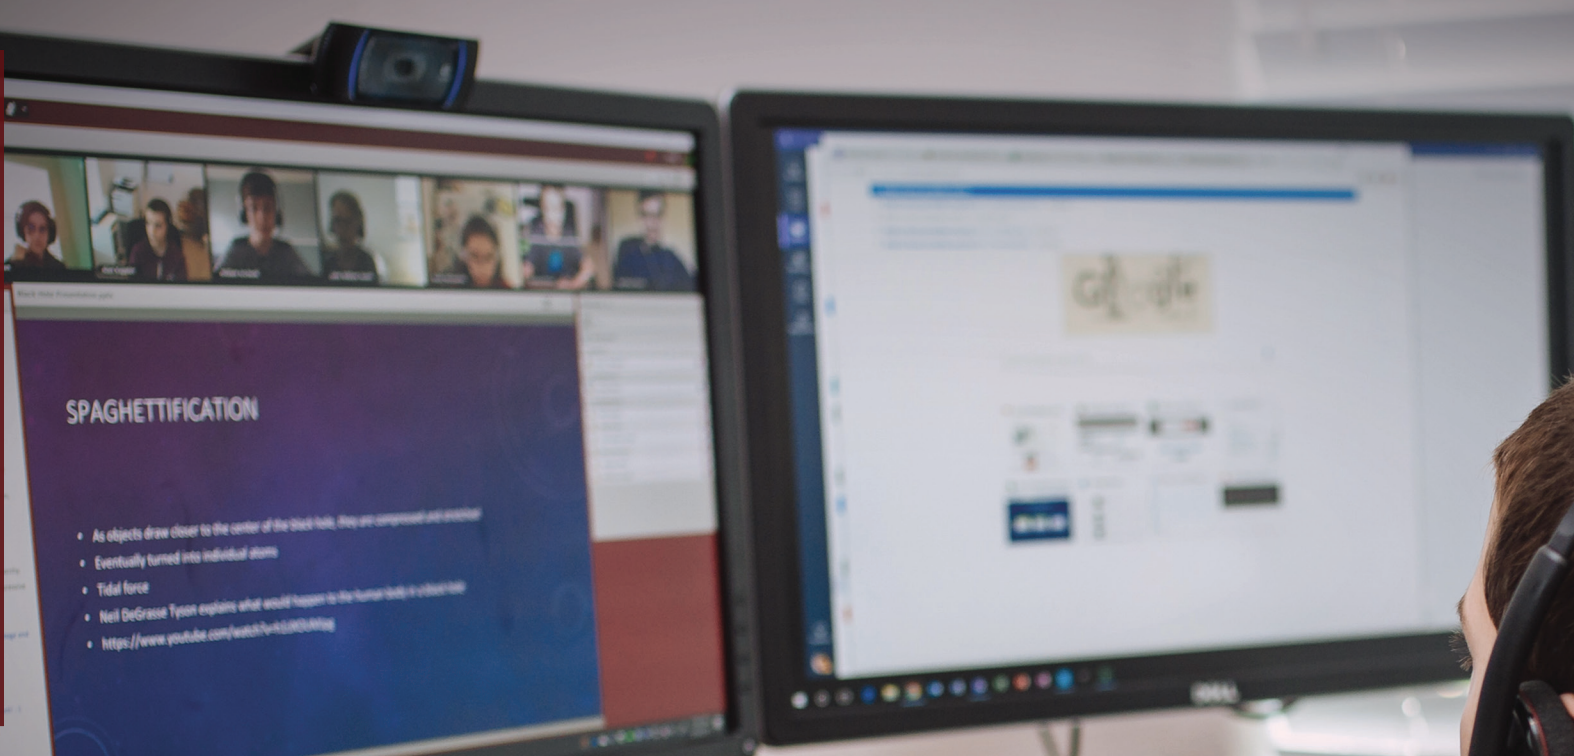

\*All times in Pacific Time

9:30AM  
**Group Project Work**

## MANY SCREENS, ONE CLASSROOM

Davidson students might live across the country, but they most definitely go to school together. With regular weekly class schedules, students meet on web conferencing software for one to three 90-minute classes a day. Through shared video screens, they participate in rich, content-based discourse, work in small groups, collaboratively solve problems, interact with teacher- or student-led presentations, and take notes—and even hang out together before and after class.

12:00PM  
**Lunchroom Session**

*"I'm in classes with other students...But for me, the fact that school is online means that I also have time alone that I really appreciate. I can actually be myself more, and more of the time, than at a brick and mortar school." —Online Student*

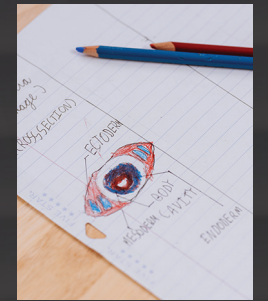

## A FULL DAY'S LEARNING

Just like brick and mortar schools, students begin live classes as early as 8:00AM. Live sessions, homework, and independent extracurricular activities in their local communities—such as music lessons, swimming, or math teams—can fill the day until about 4:00PM. Many students return to homework for a few hours in the evening.

## LEARNING TOGETHER

Davidson students work together on projects, meet before and after class to chat, eat lunch as a group while sharing video screens, and join clubs based on shared interests. It's the best of both worlds—students who can run as fast as they desire academically, while sharing the journey with similarly gifted and committed peers.

## SCHOOL BEYOND THE SCREEN

Much of Davidson happens online, but the day is also balanced with experiential activities that serve the whole child. Printed textbooks and paper notebooks are often an integral part of homework. Biology classes typically include dissection lab, delivered in the mail. All students are required to participate in physical exercise and arts activities that they love, such as local ballet or swim classes, painting classes, or French Horn lessons!

4:30PM  
**Swimming**

*"It's like a real school, except at home at my computer, not in a classroom."*

—Elizabeth

3:00PM  
**Math Club**

## CELEBRATING STUDENTS FOR WHO THEY ARE

Davidson students thrive because they are in a community. Many have spent years in school feeling isolated, different from their peers, always having to push themselves academically on their own. At Davidson, students find their group—other kids as gifted, motivated, and excited to learn as they are, no matter their age. And they find the school structure that drives them, celebrates them, and welcomes them as they are.

7:00PM
