# Responsive to business needs

Improving workflows across  
the enterprise

## What is DevOps?

DevOps is the cultural and professional movement that stresses communication, collaboration, integration and automation to improve the flow of work between software developers and IT operations professionals, which delivers business value faster through software.

The DevOps Institute (DOI) and PEOPLECERT are organizing emerging DevOps practices into relevant training and certifications to provide common knowledge, specialized skills and recognized qualifications, which will ensure high quality DevOps talent worldwide.

## Who is DevOps for?

The DevOps training and certification scheme is aimed at individuals and organizations seeking to understand and apply DevOps principles, practices and automation approaches.

**Taking exams  
has never  
been easier**

Book your exam via [peoplecert.org](http://peoplecert.org) and experience the benefits of our award-winning technology.

## What are the DevOps Qualification Levels?

The DevOps certifications scheme currently consists of three distinct certifications:

### **DevOps Foundation®**

Provides a detailed introduction to emerging DevOps principles, practices, automation, culture and integration with frameworks such as Agile, Lean and ITSM. The course is designed to be relevant to all levels of IT Professionals.

### **Certified Agile Service Manager (CASM)®**

Offers an introduction to Agile Service Management – the integration of Agile thinking and Scrum practices into service management processes and process design projects. The Certified Agile Service Manager is the operational equivalent to development's ScrumMaster.

### **Certified Agile Process Owner (CAPO)®**

Aims to describe process owner responsibilities in the context of Agile Service Management. Individuals learn how to use Agile and Lean principles and practices to design and improve 'just enough' process to support DevOps programs and align with business goals and speed.

#### **Coming soon**

Continuous Delivery Architect (CDA)<sup>SM</sup>  
DevOps Test Engineer (DTE)<sup>SM</sup>  
DevOps Leader<sup>SM</sup>  
DevSecOps Engineer (DSOE)<sup>SM</sup>

The DevOps Institute (DOI) is a global learning community that is establishing the standard for DevOps training and role-based certification at scale. Working with recognized thought leaders, a worldwide channel of Registered Education Partners (REPs) and a strategic partnership with PEOPLECERT, DOI has set the quality standard for relevant, current and sustainable DevOps course content and certification. DOI is also a founding member of the DevOps Express, an interoperability alliance between DevOps industry leaders.
