DocAve Overview

The award-winning DocAve family of products addresses the need for fast, flexible, and real-time data protection, administration, compliance, migration, reporting, and storage optimization support for your Microsoft® SharePoint® deployments. With DocAve you can protect, manage, and optimize individual SharePoint farms or multiple farms from a single, user friendly, web-based console. Full integration of all components enables DocAve to support organizations as they continue to evolve in their usage of SharePoint.

The DocAve family of products serves a variety of business-critical SharePoint functions. DocAve will seamlessly transition your organization to Microsoft SharePoint 2010 from prior versions of SharePoint or even various legacy data platforms, while at the same time intelligently protecting your mission-critical data, including full-farm backup of customizations such as the GAC, IIS, and SharePoint Hive in order to satisfy the most stringent SLA's. You can also ensure efficient platform management and iron-clad governance with DocAve's automated deployment management, centralized user and platform administration, and robust reporting functionality.

About AvePoint

AvePoint is a global technology company and software innovator. Since 2001, AvePoint has been the global leader in enterprise-strength infrastructure management solutions for all Microsoft SharePoint Products and Technologies. Propelled by one of the world's largest SharePoint-exclusive development teams outside of Microsoft, AvePoint's award-winning DocAve Software Platform delivers comprehensive and flexible infrastructure support for SharePoint backup and recovery, replication, migration, administration, archiving, deployment management, and compliance.

AvePoint's pioneering technology pilots the products of OEM partners such as NetApp and IBM. With headquarters, research facilities, and engineering centers in Jersey City, NJ, and wholly owned engineering centers and sales offices in San Jose, Los Angeles, Chicago, Washington DC, and Houston, USA; London, UK; Melbourne, Australia; Tokyo, Japan; Singapore; and Changchun, Dalian, China, AvePoint serves more than 5,000 enterprise customers, including many Fortune 500 companies. Winner of the Best of Tech Ed award for "Best SharePoint Product" in 2008, AvePoint is a Managed Gold Certified Microsoft Partner and GSA Certified Provider.

*As with all AvePoint software, the DocAve Software Platform leverages only fully supported Microsoft methodologies and API's.

DocAve Software Platform

AvePoint's DocAve Software Platform is a robust, scalable enterprise software platform comprised of numerous integrated, independently deployable software solutions. These solutions are piloted via a unified, browser-based interface from which numerous SharePoint farms can be managed with the industry's most comprehensive suite of tools for the protection, administration, integration, and optimization of SharePoint Products and Technologies.

Administration				Data Protection	Regulatory Compliance	Migration
Management	**Reporting & Testing**	**Replication**	**Storage Optimization**			

Administration

Management

Administrator
One interface to discover and manage all configurations, securities, and settings

Content Manager
Real-time, point-and-click movement of SharePoint content for swift reorganization

Deployment Manager
Automated lifecycle management of customizations and solutions, from development through production

SharePoint Antivirus
Comprehensive protection of SharePoint platforms from malicious content

Reporting & Testing

Report Center
Single-pane access to a wide variety of mission-critical data and trending statistics

Monitor
Real-time graphical topology of SharePoint environments, including all servers and their functions, relationships, roles, services, and system health

Test Environment Creator
Create and deploy complex SharePoint testing environments

Usage Simulator
Simulate usage to gain critical insights and optimize SharePoint performance

Replication

Replicator for SharePoint
Real-time one-way, two-way, and one-to-many synchronization of SharePoint content and farms

Replicator for Salesforce
Integration between SharePoint and Salesforce

- Content Replicator
  Synchronization of SharePoint content to Salesforce Content Libraries

- Data Replicator
  Synchronization of Salesforce CRM data to SharePoint

Storage Optimization

Archiver
Business-rule aware archiving for optimal platform performance

Extender
Instantly offload BLOBs to file-based storage to optimize SQL database resources, improve performance, and increase scalability

Connector
Seamless connection of external content to SharePoint

- File Share Connector
  Migration-free attachment of network and cloud file shares

- Media Connector
  Stream audio and video files stored on any network or cloud file share

Data Protection

Backup and Restore for SharePoint
Intelligent item-through-platform level data protection

High Availability
One-switch disaster recovery solution for continuous SharePoint platform availability

SiteBin
Swift and complete recovery of SharePoint sites and site collections following deletion events

Regulatory Compliance

Vault
Retain all SharePoint content in immutable form, and search with ease for total compliance

Auditor
Record and report upon all SharePoint events and activity

Content Shield
Scan all content prior to upload to ensure proactive compliance

eDiscovery
Search and report upon all SharePoint content for precision legal response

Additonal Components
In crafting your compliance strategy, also consider these DocAve offerings:

- Administrator
- Report Center
- Backup and Restore
- High Availability

Migration

Migrator for SharePoint
Seamless, fully mapped transfer of content from legacy systems to SharePoint

- SharePoint 2001, 2003, 2007
- Exchange Public Folder
- File Systems/Network Shares
- Documentum/eRoom
- Open Text Livelink/Vignette
- Lotus Notes/QuickPlace
- Oracle Stellent
- HTTP/S accessible web content

Additional AvePoint Solutions:

DocAve for Salesforce: The industry's most powerful and flexible solution, with three independently deployable modules, for the protection and integration of Salesforce CRM data.

Lotus Notes Migrator for Exchange: Seamless, automated transfer of content from Lotus Notes to Microsoft® Exchange® 2003, 2007, 2010, and Exchange Online.
