THE EXIN® PORTFOLIO

YOUR ICT COMPETENCE PARTNER

EXIN PORTFOLIO OVERVIEW

EXIN PRESENTS THE EXIN PORTFOLIO.

EXIN's mission is to be the world's leading provider of independent information management certification and accreditation. Ambitious? Sure. Too ambitious? Definitely not. We offer the most comprehensive portfolio of certificates and we cooperate with hundreds of accredited partners worldwide. These partners provide training, develop courseware and manage examination centers that provide a secure place for examination and certification. That's why EXIN, with over 30 years of experience in validating competences, is your trusted partner for ICT certification. This brochure provides you with a complete overview of our internationally recognized certifications programs. To find out more, please visit exin.com.

EXIN. YOUR ICT COMPETENCE PARTNER.

EXIN strives to help businesses and individuals reach success. As your ICT Competence Partner, we support lifelong learning. Because the world around us is changing constantly, we have to change the way we work, learn and develop ourselves. And that process influences again the world we are living in.

ICT Competences are built up of knowledge, skills and attitudes. EXIN focuses on expanding the knowledge of ICT Professionals by applying our expertise in validating their competences. To support continuous growth, EXIN offers internationally recognized certification programs that cover all ICT competence areas. These competence areas are derived from the internationally recognized e-Competence Framework (e-CF). EXIN was directly involved in the initial development of the e-CF and brings the framework into practice today.

EXIN has structured and positioned its entire certification portfolio in line with the e-CF. This consistent approach to validating competences, combined with over 30 years of experience in examination development and delivery, makes EXIN the logical choice as your global, independent competence partner for certification and accreditation in the field of ICT. For more information about the e-CF, please visit ecompetences.eu.
