## BRIDGELOGIQ Business Process Management & Workflow

## Workflow iQ Process Solutions for Government

BridgeLogiQ allows you to manage both complex & simple business workflows within your organization. Feith's comprehensive platform, incorporated into an agile development environment, is ideal for accelerated solution delivery and customer self-direction. It's a cost-effective cultural game-changer that will propel you to success.

Workflow iQ has been adopted by many civilian, defense and intelligence agencies, and here's why:

- Integrated Technologies including:
  - ✓ Imaging  ✓ RMA  ✓ Web Forms  ✓ Dashboards  ✓ more
- Multi-level administration for enterprise roll-out
- Rapid tailoring of user interfaces
- Self-documenting with test-to-production migration tools
- Roles, Rules, and Time based events with real-time auditing

## BRIDGELOGIQ Web Form Design and Management

## Forms iQ Dynamic Web Forms & Simple Front-End Capture

Forms iQ is a rapid application Web Form Creation and Capture tool that gives you a competitive advantage, increases efficiency, and saves you time and money by streamlining your business process front-end and data capture. Present rich, vibrant, customized forms on the Web that effortlessly capture information from users in a simple, friendly browser interface.

- Eliminate redundant administrative chores by automating standard forms
- Incorporate intelligent features like database validations and calculations
- Connect easily to back-end databases and third-party applications
- Initiate streamlined workflows that originate with web form data capture
- Customize entry options, field permissions, and requirements for every user

Do away with excess costs, avoidable errors, and needless bottlenecks associated with paper forms and other clunky e-form software with Forms iQ.

## BRIDGELOGIQ Records Management Application

## RMA iQ: 5015.2-Conformant Records Management Solutions

Feith's RMA iQ is a fully-integrated, fully-automated DoD 5015.2 Baseline, Classified, and FOIA/Privacy Act certified Records Management solution that ensures electronic and paper records are acquired, administered, and disposed of based on your rules, your regulations, and your retention schedules. RMA iQ allows you to:

- Handle all processes to collect, index, archive, and dispose of records
- Integrate seamlessly with any legacy application including:
  - ✓ SharePoint  ✓ Oracle  ✓ PeopleSoft  ✓ SAP  ✓ more
- Comply with your internal or external rules for email storage
- Examine archived messages and audit the retention schedule

Feith's RMA iQ solution is backed by a dynamic, integrated Workflow – incorporating integrated Auto-Categorization, e-discovery, legal hold, and redaction – for the flexibility required to effectively manage records.

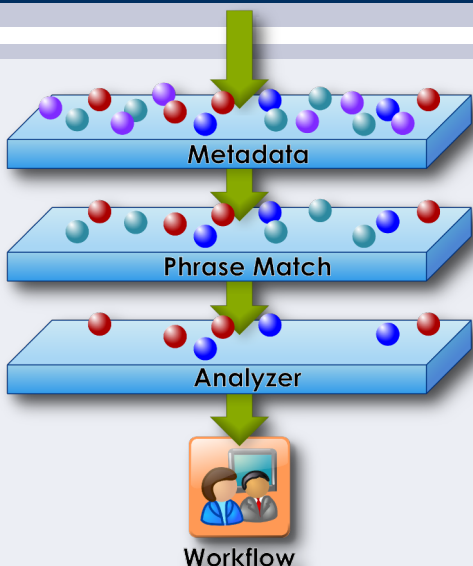

## BRIDGELOGIQ Auto-Categorization Solution

## Make Categorization Decisions Automatically with Analyze iQ

The Feith Analyze iQ application is a fully-integrated and fully-automated auto-categorization solution based on a "waterfall" architecture. This ensures that electronic objects are captured and effectively categorized based on your specific industry, organizational, or governmental requirements. Analyze iQ's escalated "filter" approach applies several levels of Boolean rules and "fuzzy" logic to ingested content.

- Quickly define structured categorization rules and logic
- Support email, electronic files, images, social media, and more
- Incorporate metadata and full text search capabilities
- Auto-categorize external repository content
- Receive notifications upon receipt of defined content
- Ensure categorization accuracy and consistency
