

◀ GALsync

DIRECTORY SYNCHRONIZATION MADE EASY

Do you have multiple Active Directory forests and need to share information in your GALs?

Has your company recently merged with another company?

Does your organization need to communicate with another company or partner on a regular basis?

Looking for a simple way to synchronize GALs and share free busy information?

GALsync is an elegant solution that integrates multiple Active Directory Forests. It is an easy to use and cost effective tool that allows you to share Exchange mail-enabled objects between forests. Sharing objects helps users in one or both messaging organizations access information about users and groups of the opposite Active Directory.

GALsync supports InterOrg Free/Busy Replication between Exchange messaging organizations, which allows users to view free/busy calendar information for Microsoft Exchange contacts. Access to free/busy data between untrusted forests is also provided for Exchange versions 2000, 2003, 2007 and 2010. It can be installed in less than an hour and does not require any trusts!

COMMON DIRECTORY SYNCHRONIZATION SCENARIOS

Multi-Forest Company Deployment

Some companies have deployed multiple Active Directory structures, thus, users cannot find the mail addresses of colleagues located at other sites in Outlook's Global Address List. With GALsync, all mail addresses will be present in Outlook.

Mergers & Acquisitions

After a merger or acquisition, it is necessary to integrate different Active Directories and Exchange organizations. GALsync streamlines the process of sharing all or subsets of all user and group information for Outlook/Exchange users in the Global Address List.

WHAT OTHERS ARE SAYING ABOUT GALsync

“The setup and creation of an export policy was so simple I had to pinch myself. We will have far fewer man hours in the install/testing/implementation of this product than just the install of IIFP!”

- Rob Brotherton, Systems Engineer

“I really like how this tool works. If you ever need me as a reference, just ask.”

- S. Ingram, Lead Infrastructure Engineer, Keystone Mercy Health

“If looking for an ultimate Active Directory integration tool, you will hardly find an alternative to GALsync. Perfectly functional, affordable and always efficient, it will save you tons of time and money, no matter if you are performing a one-time migration or doing that on a permanent basis!”

- Smart Review, 3D2F.com

Share Addresses with your partners

If your company has a partner company with whom you collaborate on a regular basis, GALsync will enable you to share some user and free busy information for Outlook and Exchange users in the Global Address List.

Ensure consistent email during a Migration

When it comes time for your company to migrate to a new Exchange organization, GALsync ensures that all migrated users may send messages to users in the original organization and vice versa.

Installation is quick and easy!

- Requires little to no training.
- Can be installed and configured in less than 1 hour.
- Configuration is done by wizards who walk you through each step.
- No additional software, hardware or database is required.
- There are no security risks at your firewall and no additional firewall port is required.
- Does not require any trusts between Exchange organizations.
- Does not require any access to Availability Service through inter net. All information can be exchanged by using E-Mail, FTP or Fileshares.

Synchronizes objects between multiple forests.

- Automates synchronization through scheduled tasks.
- Transfers are secure and do not require the setup of Trusts.
- Ensures consistent and up to date contact information for everybody.

Provides Free Busy Synchronization between multiple forests

- Scheduling meetings between organizations is simple
