

Free Database and IT Management Tools

Who says powerful software has to be hard? Database and IT professionals can make it easy and have it all with IDERA's comprehensive and complimentary portfolio of tools. **Whatever your need, IDERA has a solution.**

MONITORING & PERFORMANCE

SQL Check

REAL-TIME PERFORMANCE MONITORING

Get immediate key performance statistics for your SQL Server environment to eliminate unhappy surprises. No agents. No complications.

SQL Instance Check

DISCOVER SQL SERVER VERSIONS

Discover all SQL Server versions on the network, including IP addresses and build information of all instances, and check for available version updates.

SQL BI Check

MONITOR SQL BUSINESS INTELLIGENCE SSAS IN REAL-TIME

Monitor the performance of physical server activity as well as analysis services and view key metrics of SQL BI systems with a configurable dashboard.

SQL Fragmentation Analyzer

DETECT SQL SERVER FRAGMENTATION

Easily identify databases in need of defragmentation and set custom thresholds for unacceptable fragmentation levels.

SQL XEvent Profiler

SQL SERVER EXTENDED EVENT PROFILER

See what's happening with SQL events and XEvents simply and easily to diagnose pesky issues.

SQL Heat Map

DISPLAY SQL STORAGE UTILIZATION

Identify storage hogs on your SQL Server instances. Get instant access to space usage data and quickly locate tables and indexes that need more allocated storage.

SQL Hekaton Memory Check

CONTROL MEMORY CONSUMPTION OF MEMORY-OPTIMIZED TABLES

Monitor the performance of memory-optimized tables and assess their impact on server memory capacity.

SQL Page Viewer

SIMPLIFY FINDING PAGE DATA INFORMATION

View page level data at a glance. Troubleshoot issues in one click with a clean and simple user interface.

SQL Update Statistics

UPDATE OUT-OF-DATE SQL SERVER STATISTICS

Identify out-of-date SQL Server table and index statistics. Easy point-and-click rebuild.

SQL Statistics Aggregator

SIMPLIFY SQL QUERY TUNING

Stop combing through hard-to-read Set Statistics IO and Set Statistics Time performance information and fix problem queries faster.

SQL Query Store Optimizer

OPTIMIZE SQL SERVER QUERY STORE PERFORMANCE

Improve the performance for multiple instances of SQL Server's Query Store by optimizing its properties and contents for capturing a history of queries, plans, and run-time statistics.

MySQL Query Explorer

MONITOR AND TUNE MYSQL QUERIES

Monitor top resource consuming queries, manually run and examine any query, and view Explain Plan and Execution Statistics details.

BACKUP & ADMINISTRATION

SQL Backup Status Reporter

DISPLAY SQL SERVER BACKUP HISTORY

Quickly identify databases that have not had backups and view history based on backup date and type.

SQL Integrity Check

PROTECT YOUR DATABASE ENVIRONMENT

Prevent blockages & slowness, identify points of corruption, and receive alerts with automatic notifications.

SQL Job Manager

CENTRALIZE SQL MANAGEMENT JOBS

Easily view past and current jobs across multiple SQL Servers in our management console. See failed or runaway jobs at a glance in a customizable calendar view.

Powershell Plus

LEARN POWERSHELL IN A SNAP

Experience PowerShell by example in the interactive learning center. Gain access to hundreds of executable and editable pre-loaded scripts.

PowerShell Scripts for SQL

POWERSHELL SCRIPTS AT YOUR FINGERTIPS

These 89 free PowerShell scripts assist with daily admin tasks such as creating jobs, viewing backup statistics & more.

DATABASE DEVELOPMENT

Rapid Database Extractor

EXPLORE SQL SERVER AND ORACLE DATABASES

View and drill down into SQL Server and Oracle database objects including tables, constraints, indexes, views, procedures, functions, triggers, and packages. Execute SQL queries to retrieve data.

SECURITY & COMPLIANCE

SQL Column Search

IDENTIFY POTENTIALLY SENSITIVE DATA IN SQL SERVER TABLES

Find potentially sensitive data with 45 pre-configured sensitive data search strings. Search an entire instance or a specific table.

SQL Permissions Extractor

MIGRATE USER PERMISSIONS EASILY

Seamlessly copy permissions and execute scripts using a simple four-step process that allows you to copy, extract, modify, and apply changes easily.

IT MANAGEMENT

Windows Health Check

MONITOR WINDOWS SERVER HEALTH

Monitor the health of multiple Windows Server from a single dashboard, and view CPU, memory, disk, and network utilization.

Windows Process Heatmap

MONITOR WINDOWS SERVER PROCESSES

Monitor CPU and memory usage of Windows Server processes to quickly identify which processes are consuming the most resources.

Windows Capacity Check

MONITOR WINDOWS SERVER CAPACITY

Monitor the capacity of up to 10 Windows Servers, and track CPU, memory, disk, and network utilization.
