Database and IT Management Solutions

Who says powerful software has to be hard? Database and IT professionals can make it easy and have it all with IDERA's comprehensive portfolio of tools. **Whatever your need, IDERA has a solution.**

MONITORING & PERFORMANCE

SQL Diagnostic Manager
PERFORMANCE MONITORING, ALERTING, AND DIAGNOSTICS

A powerful performance monitoring and diagnostics solution that proactively alerts administrators to health, performance or availability problems within their SQL Server environment—all from a central console. Get detailed transactional application monitoring with the SQL Workload Analysis add-on for SQL Diagnostic Manager.

SQL Inventory Manager
DISCOVER AND TRACK YOUR SQL SERVER ENVIRONMENT

An effective tool for tracking your SQL Server inventory to know what you have where and who owns it, view health check summaries & recommendations, and get alerts when a server goes down or space is running low.

SQL Doctor
COMPLETE SQL PERFORMANCE TUNING

A revolutionary tool that analyzes SQL Server performance data and provides ranked recommendations to fix performance issues.

SQL Defrag Manager
FIND AND FIX SQL FRAGMENTATION

A one-of-a-kind solution that automates the time-consuming process of finding and fixing database index fragmentation issues across multiple SQL Servers.

SQL BI Manager
MONITOR & MANAGE SQL SERVER BUSINESS INTELLIGENCE

A business intelligence tool that provides agentless monitoring of SQL Server Analysis Services, Reporting Services and Integration Services servers and services.

DB Optimizer
AUTOMATE SQL TUNING AND PROFILING

An automated SQL optimization tool that maximizes database and application performance by quickly discovering, diagnosing, and optimizing poor-performing SQL code on multiple database platforms.

DATABASE DEVELOPMENT

DB Change Manager
TRACK AND MANAGE COMPLEX DATABASE SCHEMA CHANGES

An essential database change management tool for multiple platforms with automated compare and synchronization capabilities to simplify change operations.

Rapid SQL
CREATE HIGH PERFORMING SQL CODE

An intelligent SQL IDE empowering database developers and DBAs to create high-performing SQL code on all major database platforms from a single interface.

SQL Comparison Toolset
SQL SERVER OBJECT AND DATA COMPARISON

A set of products that perform object and data comparison, as well as synchronization.

DATABASE DESIGN & ARCHITECTURE

ER/Studio Data Architect
MODEL, ANALYZE AND OPTIMIZE ENTERPRISE DATA

A powerful data modeling tool that enables companies to discover, document, and re-use data assets across logical and physical models for multiple platforms.

ER/Studio Enterprise Team Edition
MAP ENTERPRISE DATA AND METADATA WITH BUSINESS CONTEXT

A powerful business-driven data architecture solution that combines multi-platform data modeling, design, and reporting with cross-functional metadata and glossary collaboration for enterprises of all sizes.

IDERA

SQL Safe Backup
AUTOMATED BACKUP ACROSS ALL SQL SERVERS

A high-performance backup and recovery solution for SQL Server that saves money by reducing database backup time by up to 50% over native backups and reducing backup disk space requirements by up to 95%.

SQL Virtual Database
ACCESS DATA FAST IN A VIRTUAL SQL SERVER

A powerful, one-of-a-kind solution that lets you attach SQL Server backup files and query them just like they were real databases.

SQL Admin Toolset
SIMPLIFY DAY-TO-DAY SQL SERVER ADMINISTRATION

A comprehensive suite of 24 powerful SQL Server tools that make troubleshooting, administration and reporting easier.

SQL Enterprise Job Manager
MONITOR & MANAGE SQL SERVER AGENT JOBS

A configurable job monitoring tool that effectively monitors and manages SQL Server agent jobs from a centralized console with calendar views and in-depth analysis of job status and performance.

DBArtisan
MANAGE MULTIPLE PLATFORMS WITH ONE INTERFACE

An intuitive database administration solution that utilizes integrated performance analytics to maximize availability, performance, security and collaboration for multiple DBMS platforms from one central console.

Uptime Infrastructure Monitor
UNIFY IT PERFORMANCE MONITORING AND OPTIMIZATION

A flexible server monitoring tool that proactively monitors physical servers, virtual machines, network devices, applications, and services across multiple platforms running on-premise, remotely, or in the cloud.

Uptime Cloud Monitor
VISUALIZE YOUR CLOUD INFRASTRUCTURE PERFORMANCE IN SECONDS

An essential monitoring tool to identify and react to cloud infrastructure issues, such as performance, health, and server metrics, with desktop and mobile interfaces.

Precise Application Performance Platform
MULTI-PLATFORM APPLICATION AND DATABASE MONITORING

An application performance management solution that proactively monitors, analyzes, and measures system performance of off-the shelf application stacks and relational database platforms.

SQL Compliance Manager
MONITOR, AUDIT & ALERT ON SQL SERVER USER ACTIVITY & DATA CHANGES

A comprehensive auditing solution that tells you who did what, when and how on your SQL Servers to help you ensure compliance with regulatory and data security requirements.

SQL Secure
IDENTIFY & MITIGATE SQL SERVER SECURITY RISKS

A security solution that collects and analyzes permissions data from SQL Server, Active Directory and the file system and registry to show who has access to what database objects and how that access is granted.
