- 4:1 Ratio of Engineering Staff to Sales/Other

- Proven technical methodology to ensure project success

- Highly certified technical staff with respective technologies

- Reactive and MSP customer support models available

- Multi-vendor experience to ensure compatibility

Desktop-As-A-Service

A simpler way to **simplify IT**
A better way to empower **your workforce**

- What if Windows apps and desktops could be assigned to people, not devices?

- What if you could provide access to a new user in seconds instead of hours, or even days?

- What if you could approve, and securely manage, more personal devices for work?

- What if you could centrally manage all of your company's applications and deliver them as an on-demand service? **Well, that's where IntraSystems comes in!**

IntraSystems can help make these "What Ifs" a reality by implementing the most powerful, easy-to-manage IT solutions!

- IntraSystems can deliver complete business-ready desktops with all of your applications, data, and email delivered from a secure cloud of your preference

- IntraSystems securely manages your desktops and hosts the desktops in - delivered to your employees over the web to any device

- A complete mobile workstyle solution that includes virtual desktop, email, office productivity and line of business applications, file sharing and sync for your data

Taking IT one step further

- Faster, easier way for your team to access their desktop environment - even when they're nowhere near their desktop

- Use any device - maximizing mobility and productivity

- Centrally manage Windows apps and desktops in the datacenter

- Be rest assured that sensitive business information is secure

Case Study

Challenges & Opportunities

Client develops application which required them to go onsite to install and manage application for many customers. Customer issues were becoming extremely difficult to manage for client(s) as well as driving up their costs.

Solution

Implement the IntraCloud Exchange Virtual Workspace Desktop-As-A-Service solution by IntraSystems by hosting client's application (Hosted App model). By utilizing the IntraCloud Exchange Virtual Workspace DaaS, we are able to manage (and upgrade, if necessary) as well as provide secure access for their customers to utilize their application.

Result

- Lower cost of application

- Higher performance by customers

- Allows client to be more responsive in adding customers at a minimal cost

DAAS Models

	Hosted Applications	Hosted Server Desktop	Dedicated VDI
Base Platform	Windows 2K8 R2/XA	Windows 2K8 R2/XD	Windows 7/8/10/XD
Customization	Personalization	Application	Operating System
