intra cloud exchange
Virtual Workspace

It's simple, flexible, and affordable!

Today, many organizations are using an average of four cloud services, such as email, file sharing, CRM and backup in their environment. However, many are finding that what they really need is a single solution to simplify IT for their organization. Mixing legacy in-house solutions with cloud services from different providers can be more complex than what you had before. In fact, 56% of organizations prefer a single source for their hosted IT where they can get all of the applications and the services and support they need.

IntraSystems makes this type of service possible by making sure you have efficiencies in your cloud through automation (reducing cost), best performance over the wire (user experience), and being accessible from everywhere including all the latest mobile devices.

How would you answer the following questions?

- Do you want to spend **less time and money on IT?**
- Do you have **limited IT staff or expertise?**
- Do you have employees that **work outside of the office?**
- Do you have employees that want to **use their tablet and smartphone** for work?
- Do you lack a **business continuity plan?**
- Are you challenged by **seasonal employment spikes?**

If you answered "Yes" to any of the questions listed above, then IntraSystems has the services and support you need!

HAVE YOU CONSIDERED DESKTOP-AS-A-SERVICE?

Focus on business growth.... not IT growth

Desktop-as-a-Service (DaaS) brings together the desktop, applications, data and IT services into a single cloud solution. This solution enables people to access all of their apps and data—cloud or local—from a hosted desktop on any device—Windows, Mac, tablet or smartphone—from any location.

Consider the following benefits:

- **SAVE MONEY**:
    - No cost for hardware
    - Can run on lower performing/low cost laptops
    - Lower ongoing support costs
    - Save money in compliance costs
- Ideal for companies with a wide user or global workforce
- Can standardize....so everyone has the same desktop
- No need to worry about viruses impacting applications

Commonly Asked Questions:

Question	Response
Will I need to buy new desktops and software?	DaaS solutions deliver a high-definition experience to any device - even your aging devices that are due for an upgrade. There are no upfront costs, no new hardware or software to buy and you only pay for the applications and IT services you use.
How do I get to my information? Is it secure?	All of your data and applications are centrally stored and backed up in the data center (several options to choose from, based on your needs). You securely access your desktop, apps and data with an encrypted connection from any device, anywhere.
Can I maintain my current IT staff?	IT staff are freed from mundane, low-value tasks such as desktop support, updates and responding to fire drills. Instead, they can focus on strategic initiatives the help fuel business growth. What project have you always wanted to do?
I can already read email from my phone or tablet. How is this different?	What about all the apps and data you use to run your business. DaaS solutions make any device a desktop workspace with full access to all of your apps and data.
We backup our data in case of a disaster. Isn't that enough?	Backup is just one part of the business continuity play. DaaS solutions not only ensure that applications and data remain available, but that your workers can stay productive from any location - using whatever device they have available.

About IntraSystems:

IntraSystems was founded on the premise that a company should focus on their core competencies - not systems and networking infrastructure issues. By assisting in the design, installation, security, and maintenance of networked technologies, IntraSystems enables corporations to focus on business growth and utilize new technologies to enhance corporate productivity. We follow through on all aspects of IT planning, development, and maintenance for server-based computing, security and network integration, network diagnostics, virtual private networks, disaster recovery, and outsourced technical support. Over the years, these services and our long-standing reputation of technological and business integrity have merited an impressive list of satisfied customers. It's an approach that works well in everyday situations — and drives our success!

KEY FEATURES

1 Simple, self-service IT that gives you freedom and flexibility

2 Pay for only what you use as a predictable monthly expense

3 Ensure your business can weather a disruption and your employees can stay productive

With IntraCloud Exchange Virtual Workspace, You're Not Alone!
