INVESTOR PRESENTATION
FALL 2018

FORWARD-LOOKING STATEMENTS

In general. This disclaimer applies to this presentation and the verbal or written comments of any person presenting it. This presentation, taken together with any such verbal or written comments, is referred to herein as the “Presentation”. NexOptic Technology Corp. is referred to herein as “Company”. Making investments such as those to which this Presentation relates may expose an investor to a significant risk of losing all or part of the amount invested.

No offer to purchase or sell securities. The Presentation or the information contained therein does not constitute or form part of an offer or invitation to sell, or a solicitation of an offer to subscribe for or buy, any security. The Presentation or the information contained therein may not be relied upon in connection with the purchase or sale of any security in any jurisdiction in which such offer, solicitation or sale would be unlawful. Any such offer would only be made by means of formal offering documents, the terms of which would govern in all respects and which may be subject to the approval of the relevant regulator and may include discussion of certain risks, conflict of interest and other information important to any investment decision. Investors should not subscribe for any securities referred to in this Presentation except on the basis of the information contained in a formal offering document relating to such securities.

Past performance. In all cases where historical performance is presented, please note that past performance is not a reliable indicator of future results and should not be relied upon as the basis for making an investment decision.

Forward-looking statements. “Forward-looking statements” (including the Company's opinions, expectations, beliefs, plans, objectives, assumptions or projections regarding future events or future results) contained in the Presentation are based on a variety of estimates and assumptions by the Company, including, among others, estimates of future operating results, financial condition and liquidity, and the development of the industry in which the Company operates. These statements generally are identified by words such as "believes," "expects," "predicts," "intends," "projects," "plans," "estimates," "aims," "foresees," "anticipates," "targets," and similar expressions. These estimates and assumptions are inherently uncertain and are subject to numerous business, industry, market, regulatory, geo-political, competitive and financial risks that are outside of the Company's control. There can be no assurance that the assumptions made in connection with the Forward-looking statements will prove accurate, and actual results may differ materially, including the possibility that an investor may lose some or all of any invested capital. The inclusion of the Forward-looking statements herein should not be regarded as an indication that the Company considers the Forward-looking statements to be a reliable prediction of future events and the Forward-looking statements should not be relied upon as such. None of the Company or any of their respective representatives has made or makes any representation to any person regarding the Forward-looking statements and none of them intends to update or otherwise revise the Forward-looking statements to reflect circumstances existing after the date when made or to reflect the occurrence of future events, even in the event that any or all of the assumptions underlying the Forward-looking statements are later shown to be in error.

No reliance, no update and use of information. You may not rely on the Presentation as the basis upon which to make a decision. To the extent that you rely on the Presentation in connection with any decision, you do so at your own risk. Any person who is in doubt about the subject matter of this Presentation or any investment in connection with the same should consult their own advisers on such investments. The Presentation does not purport to be complete on any topic addressed. The information in the Presentation is provided to you as of the dates indicated and the Company does not intend to update the information after its distribution, even in the event that the information becomes materially inaccurate. Certain information contained in the Presentation includes calculations or figures which have been prepared internally and have not been audited or verified by a third party. Where any information and statistics are quoted from an external source, such information or statistics should not be interpreted as having been adopted or endorsed by the Company as being accurate. Use of different methods for preparing, calculating or presenting information may lead to different results and such differences may be material.

WHO WE ARE

We create optical technologies that enable people to see further, **always looking beyond the horizon.**

WHAT WE DO

We are currently developing the world's largest aperture for smartphone lenses, our state of the art outdoor imaging devices and more.

WHY?

Lenses should bring the action closer and enhance your view of the world. **Our optics will change the human experience.**

NEXOPTIC

MEET OUR NEWEST DIRECTOR:

FORMER NASA CHIEF TECHNOLOGIST,
BOBBY BRAUN

“The company’s sensing capabilities impact a range of applications that affect our lives, from leisure activities to security. The NexOptic team is **innovative, collaborative, and capable** of moving this technology to market.”

BOBBY BRAUN

BLADE OPTICS™

THE FUTURE OF IMAGING.

With or without the use of flat optical elements, our suite of disruptive optical technologies, known as **Blade Optics™**, allows for larger apertures and longer focal lengths in imaging devices; enabling us to see further and with much higher resolution.

Blade Optics™ includes NexOptic's lens designs, algorithms, mechanics, and all of the company's intellectual property and know how, which vary from patent-pending to patented.

SEE FURTHER.

IT'S ABOUT THE APERTURE

“As a general rule, the larger the aperture . . . The farther and more precisely you can see . . . People get hung up on magnification, which is a function of lenses in the eyepiece, when it's the aperture that's much more important.”

- Kelly Beatty, Senior Contributing Editor of *Sky & Telescope* magazine and member of the astronomy faculty at the Clay Center Observatory in Boston

UNSHACKLED FROM OPTICAL DOGMA

THE ORIGINAL PROOF OF CONCEPT

Utilizing our patented flat optical element design, we achieved an unprecedented telescopic form factor in our first prototype. This lens design is just one of several in the **Blade Optics™** suite of optical technologies.

Our proof-of-concept prototype was a telescope system containing flat optical elements, a square aperture, and near **1:1 lens stack depth to aperture ratio**.

SEE FURTHER.

BREAKING THE MOULD

We achieved the largest possible aperture in a fixed depth, and demonstrated our dramatic form factor benefits.

PROOF-OF-CONCEPT RESULTS

Using identical image processing techniques, we successfully compared the image quality from our 5" aperture telescope to a leading 5" aperture Schmidt Cassegrain telescope. - **The image results are near indistinguishable.**

MOBILE LENS SOLUTION

SEE FURTHER.

12

BETTER LENSES. BETTER IMAGES. BETTER MEMORIES.

Our telephoto lens system could provide **3.5x more light-gathering area** in comparison to leading smartphone long-range lenses with a 2.5mm aperture—which would allow for dramatically improved long-ranged imaging.

3.5x THE LIGHT-GATHERING AREA

Size Matters.

SEE FURTHER.

MOBILE “FIRST LIGHT” RESULTS

A world leader in optical and electro-optical metrology, **Optikos Corporation**, conducted a series of technical tests on our first smartphone lens assembly.

Our optical engineers conclude that our initial lens assembly has an **overall angular resolution of greater than 35%** relative to a comparative, industry leading telephoto lens.

**InfoTrends estimates people will take
over 1.2 trillion images this year.**

THE BIGGER PICTURE.

GLOBAL LENS MARKET

14% compound annual growth rate (CAGR) of camera module industry between 2014-2020 est.

THE FUTURE OF THE GREAT OUTDOORS

Before giving us brilliant design, NewDealDesign of San Francisco helped iconic brands such as Intel, Microsoft, Google, Fitbit, Comcast and others make some of their best ideas real. This makes them integral to some of the most innovative and market-winning products created over the last two decades.

Combining our Blade Optics™ lens designs with modern electronic interfaces, our device is being engineered to redefine outdoor exploration by providing a truly transformative imaging experience.

We believe that our product will enhance everything from **hiking, fishing, and wildlife viewing—to boating, sporting events, and more.**

“I believe humans are curious and always
strive to discover a **better, more
meaningful** view of our world. With
NexOptic’s technology, we have the
potential to transform the human experience
of the outdoors and make it far more
sharable, social and inclusive.”

GADI AMIT, PRESIDENT & FOUNDER OF
NEWDEALDESIGN

CHANGING SPORT OPTICS FOREVER

UNCHARTED TERRITORY

Our first consumer product incorporates an innovative dual lens system with a unique, compact form factor that is synonymous with Blade Optics™ lens designs.

DOUBLE TAKE

Our product combines optical precision and novel UX features to eliminate traditional blocks in targeting and spotting. **It enables multiple perspectives to ensure you never miss a moment, and have fun capturing it too.**

DIGITAL PIONEER

Intended to leverage the software interactions consumers expect from modern devices, our device will offer a remarkable digital experience that invites you to explore differently.

INTUITIVE DESIGN

Sporting a sleek but rugged design, our product masterfully blends utility with style. Beautiful moments should be captured by beautiful devices.

B R E A K I N G B O U N D A R I E S .

A NEW MARKET IN SIGHT

Action cameras, point and shoots, binoculars and smartphones have saturated their markets. Our sport optics product can appeal to both outdoor and gadget enthusiasts alike, providing an exciting alternative to conventional imaging devices.

ADDITIONAL CORPORATE
INFORMATION

OUR MANAGEMENT

DARCY DAUGELA

Chairman

Mr. Daugela has a passion for leading development of practical applications from cutting edge technology. Over Mr. Daugela's 30 year career as a professional engineer, he has been granted several patents, with a history of innovation in a wide variety of applications and industries (including agriculture, oil and gas, information technology, process control, and optics).

JOHN DAUGELA

Chief Executive Officer

Having managed several firms over his 25 year career, Mr. Daugela has been successful in many diverse leadership roles including President, Founder, Project Manager and Technology Development Lead. Mr. Daugela has been a key innovator in several core elements of intellectual property and has helped bring dozens of industrial products to market.

OUR MANAGEMENT

PAUL MCKENZIE

President & Chief Business Officer

Mr. McKenzie has acted in the capacity of Co-Founder, CEO, CFO, President and/or Director to several successful, publicly traded companies. He has been integral in raising over US \$70 million for his associated companies. He is the Co-Founder and Director of a company building highly sophisticated, multilingual applications for smartphones and desktops, designed to service a broad spectrum of the \$80 billion promotions market in terms of client profile and needs fulfillment.

SAMANTHA SHORTER

Chief Financial Officer

Ms. Shorter has over a decade of experience in providing reporting, assurance and accounting services to publicly traded companies, including technology companies. Her depth of governance and accounting knowledge insures effective implementation and oversight for financial reporting, administration and internal controls development and budgeting for NexOptic.

BOARD OF DIRECTORS

STEPHEN PETRANEK

Director

Mr. Petranek is a widely-recognized technology futurist and award-winning author, and is the former editor-in-chief of several respected scientific and financial publications. He is also the Co-Executive Producer of the National Geographic mini-series “MARS”, which is based on, and inspired by, his book, “How We’ll Live on Mars,” published by Simon and Shuster and the TED Conferences.

ARCH MEREDITH

Director

Mr. Meredith is Managing Partner of Kite Hill Capital, a private venture capital firm, which has been a pre-IPO and early investor in various companies in the technology sector, including, among others, Tesla Inc. and Uber Technologies Inc. Mr. Meredith was Co-Founder, former President and Chief Financial Officer of the Chroma Group, Inc., which developed patented technologies for pattern recognition and visualization.

BOARD OF DIRECTORS

KAREN FLEMING

Director

Ms. Fleming has extensive experience in securities and corporate legal matters and corporate governance initiatives. She is the former General Counsel Canada and Corporate Secretary to Canadian Pacific Railway (“CP”), where for 17 years she regularly advised senior executives and its Board of Directors on corporate governance and legal issues including financial transactions as well as due diligence, and securities matters.

BOBBY BRAUN

Director

Dr. Braun is the dean of engineering and applied science at the University of Colorado Boulder. He has worked in the space community for more than 30 years and served as NASA’s Chief Technologist. He was instrumental in the design and execution of the entry, descent and landing system for NASA’s Mars Pathfinder mission and has contributed to every U.S. Mars landed mission since.

S E E F U R T H E R .

INTELLECTUAL PROPERTY STRATEGY

NexOptic is working with two prestigious US IP law firms and Canada's leading IP law firm to advise on its intellectual property protection strategy.

NexOptic is currently patented and patent-pending on multiple applications specific to its lens technologies and designs.
