

DEVELOP A FRAMEWORK FOR INCLUSIVE ICT INNOVATIONS

Joint Action starting in Sep. 2019

Team up with us and co-create the future of innovation

Initiated by

SIEMENS

ICT innovations entail huge potentials for improving citizens' daily lives. It is a major challenge to make these advantages available for those often not at the centre of new smart technologies. This Joint Action seeks to explore ways of including the needs of people such as impaired persons or deprived social groups into responsible ICT solutions.

- **Purpose:** Developing a concept of how to include Inclusive Innovation into co-creation.
- **Starting point:** Making use of the experiences with addressing inclusive issues within the LIV_IN co-creation workshops.
- **Target Groups:** Companies and experts engaged/interested in process and methods of Inclusive Innovation.
- **Outcomes:** Guideline for performing Inclusive Innovation encompassing key elements, methods, and practical requirements.
- **Impacts:** Extending responsibility in ICT research and innovation by considering inclusive issues. .
