Technology at work for you

Connecting your learners online

We pride ourselves on the learner experience.

By using readily available technology (computers, webcams, microphones) we often bring a brand new experience to learners around the globe. Bringing learners closer together through technology is the focal point of **Leading Edge Training Solutions LLC**.

Focusing on the learner first ensures that the design and delivery of the training are going to meet the needs of adult learners. Even though you are not physically in a classroom setting together, the experience is rich and engaging.

CONSULTING

- Virtual Content Design
- Virtual Facilitation Skills
- Virtual Basics Crash Course
- Technology Consulting

Virtual Content Design

Whether you are designing a course from the ground up, or just need some assistance thinking through an exercise. **LETS** will work with you to ensure effective delivery of the content every time.

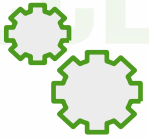

- Presentations
- New Hire Training
- Human Resources Training
- Leadership Training
- Managed Markets Training
- Key Account Management
- POA Meetings
- Virtual Advisory Boards

LETS provides industry leading production and technology.

- Skilled Producers
- Leading Edge Technology
- Production Software
- Streaming Capabilities

Virtual Solutions for Training & Development

CUSTOM CLASSROOM LEARNING

No two classes are ever the same.

We work hard to ensure that your learners needs are met based on the learning objectives of the program. We will recommend changes on the fly based on the evolution of the virtual exercise. If we see that the class is waning, we can help make simple recommendations to get them back on track.

TRAINING & MEETING SOLUTIONS

Do you have a need to do something different from a training or meeting perspective?

Would you like to demonstrate a new capability, model or product?

Work with our team to create the most interactive virtual training possible.

CORPORATE INFRASTRUCTURE

Sometimes just knowing the landscape is half the battle. Forming a partnership across multiple stakeholders is a key to virtual learning success. Allow **LET'S do the heavy lifting when it comes to IT.** We have extensive knowledge of corporate networking infrastructure, and can partner with those teams to ensure success.
