

## Exchange Monitoring and Reporting ▶

In today's economy, budgets are being slashed and IT Departments are expected to produce more results with fewer resources. With email being one of the most mission-critical tools for any organization today, how do you ensure that this vital business communication stays up and running?

- Importantly, how do you demonstrate to senior management that additional resources are needed to meet growing demand or that service levels are being met?

The answer is simple: Mailscape is an award-winning, total systems management tool that combines all the key elements for Exchange monitoring, reporting and administration into an affordable and easy-to-use solution.

- 2-time winner of MSEXchange.org's Best Exchange Administration tool.
- Featured in InfoWorld as the perfect monitoring tool for the Help Desk and other first-line responders.

We have gathered feedback from Exchange MVPs and technology leaders from around the world to create an innovative solution that provides:

### **Simplicity and Value**

- Instead of forcing you to use separate, complicated products for monitoring and reporting, Mailscape makes your job easier by putting everything you need into a single, concise tool.
- Mailscape is easy to deploy and intuitive to use. You will be up and running in minutes rather than days.

### **Customizable Reporting**

- Mailscape's advanced reporting provides both the real-time data and historical trending you need to optimize system performance, improve service levels, plan for the future and get clear visibility into your company's messaging platform.
- Mailscape provides over 200 built-in reports, plus gives you the ability to customize an existing report or create a new complex query with minimal effort.

### **Personalized Dashboards**

- Provide key roles in your organization with their own automatically self-generating dashboard that contains information only relevant to their position.
- Decide once which reports each role needs and provide information that is always current, never static.

### **Proactive Monitoring**

- Mailscape's web-based One Look dashboard makes it easy for you to monitor all your environmental vital components with a quick glance at a single screen - even from your PDA.
- Mailscape automatically tests critical Exchange services, such as Mail Flow, Outlook Web Access, ActiveSync, BlackBerry, Outlook Anywhere and cluster health (CCR.)

"The graphical display of data makes it easy enough that the Help Desk can quickly diagnose the cause of a problem and take a more active role in monitoring the system. Plus, the customizable reporting makes it easy to create very complex queries. Overall, Mailscape is a very impressive solution, and one that sets itself apart from the competition."

- Lasse Pettersson, Exchange MVP

# Open Up the Hood on Your Exchange Server...

Open up the hood on your Exchange server...and go beyond generic monitoring. Mailscape delivers comprehensive monitoring on all the key components in your environment. Listed in the table below are some of the key areas Mailscape monitors.
