MAXAVA HA ENTERPRISE LEVEL DISASTER RECOVERY FOR IBM i

Maxava offers High Availability software that uses the full native functionality of the IBM i operating system. Maxava HA Suite provides real-time replication, unlimited concurrent apply processes, constant data checking and an easy to use GUI and mobile monitoring system.

Whether you operate a Fortune 500 enterprise or a small business, whether you are ensuring business continuity for packaged or home-developed IBM i applications, Maxava has a solution for you. Cost effective and scalable, the Maxava HA Suite provides the highest levels of usability, performance and readiness.

High Performance Replication

- Uses 100% native IBM i Remote Journaling for highly efficient replication that reduces the load on the production server
- Unlimited concurrent apply processes easily process high transaction volumes and minimize replication latency

Always Role Swap Ready

- Easily see the replication synchronization status via the GUI or green screen interfaces
- Constant data checking ensures data integrity
- Self-healing technology detects and fixes issues automatically

Simple to Use

- Intuitive GUI and green screen facilitates daily management in minutes
- Remote or on-site installation saves time and costs
- Mobile device support allows you to monitor your HA Solution from anywhere

MAXAVA
MAXIMUM AVAILABILITY

Maxava produces the world's premier business continuity and replication products for IBM i. Our performance levels have been proven in the toughest environments for the most demanding clients.

Maxava supports a global client base directly and via a network of strategic alliances and partnerships. Maxava is dedicated to IBM i, and focused on delivering the highest service levels to IBM i customers across all major industries.

“Maxava HA provides us with two significant benefits - disaster recovery capabilities and uptime.”

David Ginn, KSB Hospital

MAXAVA HA SUITE

Maxava HA™ ENTERPRISE+

Maxava HA Enterprise+ delivers the most comprehensive high availability and disaster recovery readiness for an IBM i application. Enterprise+ includes all the functionality of the SMB version with enhanced replication and monitoring tools necessary for more complex environments.

Maxava HA™ SMB

Maxava HA SMB provides cost effective High Availability to protect your IBM i business critical applications and data. It incorporates advanced autonomies, and offers enhanced auditing and user administration tools.

Maxava HA™ DATA STREAM

Maxava HA Data Stream is a highly efficient data replication solution that ensures business critical data is backed up in real time and fully recoverable.

MAXAVA IN THE CLOUD

Focus on your core activities and leave your disaster recovery to the experts. In partnership with carefully selected data center providers, Maxava HA products are also available as part of a disaster recovery solution for an inclusive and affordable monthly fee. www.maxavacloud.com explains this option further.

maxView MANAGER, MONITOR, LITE

maxView delivers a smart and easy way to monitor your Maxava HA environment and allows you to easily check relevant IBM i system resources from any web ready device.

Some of our customers

Bendon	Murco Petroleum	Westpac
Revlon	Nintendo of Europe	Weidenhammer
Walkers Shortbread	CSCS	QBE
Bentley Motors	KSB Hospital	Glen Dimplex
Government of Gibraltar	ND Logistics	Commonwealth Bank

Industries we serve

Banking	Logistics
Construction	Manufacturing
Government	Retail
Healthcare	Transportation
Insurance	Telecommunications

KEY FEATURES

Some of the key features of the Maxava HA Suite include;

Maxava HA Product Features	DATA STREAM	SMB	ENTERPRISE ⁺
Data replication	●	●	●
Object replication (Over 50 different types)		●	●
DTAARA / DTAQ	●	●	●
User profile replication		●	●
Spool file replication		●	●
Dynamic database management		●	●
Library replication		●	●
Save-while-active		●	●
Block level data audit		●	●
Block level data refresh		●	●
IFS replication		●	●
MQ Series replication			●
QDLS Replication			●
Command Scripting Function			●
maxView Lite	●		
maxView Monitor		●	
maxView Manager			●
Concurrent apply processes	VIRTUALLY UNLIMITED	VIRTUALLY UNLIMITED	VIRTUALLY UNLIMITED
Select / Omit		●	●
Library redirection	●	●	●
Role swap / Fail over		●	●
Simulated role swap			●
Library management function			●
Graphical command centre	●	●	●
GUI journal management	●	●	●
Right click resynch on GUI		●	●
Green screen menu	●	●	●
Patrolmax monitoring		●	●
Property file		●	●
Auditing tool		●	●
ASP & IASP support	●	●	●

Maxava HA is implemented by certified technicians and can be delivered remotely or with on-site support as required.
