

ORCHESTRATED CYBER SECURITY OPERATIONS AND REPORTING

Automatically see, prioritize and act on cyber threats.

Spend time managing risk, not data

Cyber threats are unrelenting. Your security team is faced with an overwhelming amount of data as they race to find and fix vulnerabilities. Prioritization is difficult, informed decisions nearly impossible.

The NormShield cloud platform automates finding vulnerabilities, prioritizes them and provides actionable intelligence. Reduce risk as never before possible, and at an affordable price:

- CISOs make informed decisions with continuous visibility and measurable performance.
- Security teams take swift action with prioritized tasks and auto-assigned tickets.

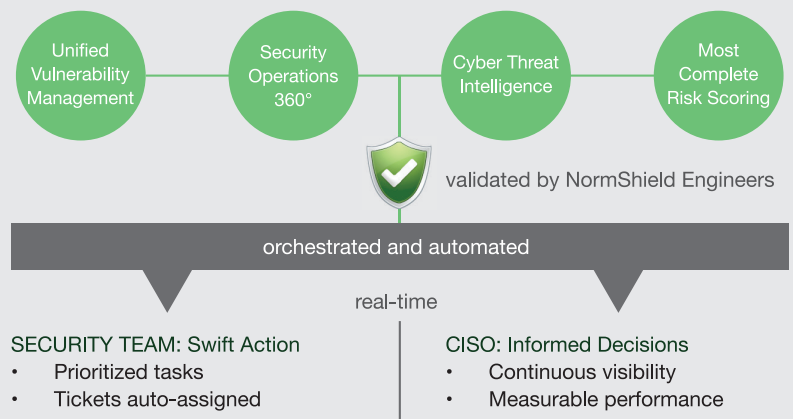

Orchestrated cyber security operations and reporting in one cloud platform

- Unified vulnerability management
- Cyber threat intelligence
- Security Operations Center 360°
- Executive risk scorecard

Advanced Automation + Human Intelligence

You receive breakthrough reliability with advanced automation and human intelligence. NormShield's world-class cyber engineers provide a "hacker's view" to constantly refine automated detection, reduce false positives and extract information where automation can't go.

THE NORMSHIELD CLOUD PLATFORM

ORCHESTRATED CYBER SECURITY OPERATIONS AND REPORTING IN ONE CLOUD PLATFORM

UNIFIED VULNERABILITY MANAGEMENT

NormShield UVM

Best in Class Discovery

- Automatic discovery of system changes and anomalies
- Findings analyzed and prioritized
- False positives eliminated
- Root causes identified
- Effectiveness of resolution measured

CYBER THREAT INTELLIGENCE

NormShield CTI

Hands-Down Most Coverage

- Early warning before hackers exploit
- Continuous and real-time monitoring
- Monitors all sources, such as dark web, brand monitoring sites, social media and more
- IP/domain reputation control
- Fraudulent mobile app and domain tracking

SECURITY OPERATIONS CENTER 360°

NormShield SOC 360°

Continuous Perimeter Monitoring

- Automation + human intelligence
- Automated SMTP and DNS health check
- Domain and SSL monitoring
- Uptime monitoring
- Website and social media hijack detection

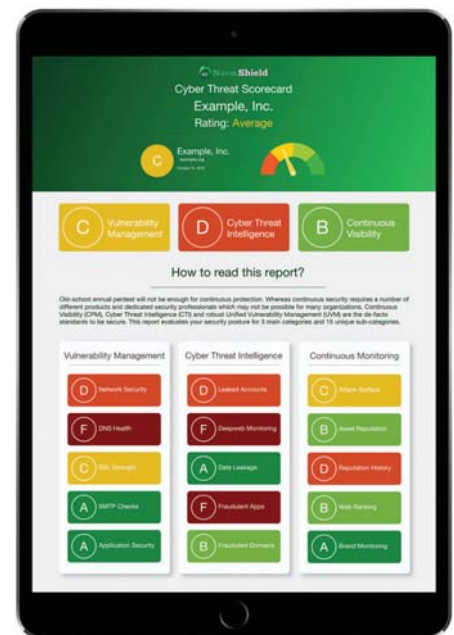

EXECUTIVE RISK SCORECARD

Measurement and Reporting Tool

Executive Visibility

- Understandable letter-grade format
- Informed business decisions
- Measurable performance
- Early warning for high risk vulnerabilities

Included with the NormShield platform or through separate subscription
