

FULL CUSTOMIZATION FOR THE
HIGHLY IRREGULAR, MEDICALLY
INDICATED CORNEA.

Designed by You, expertly Made to Measure by Blanchard.

WHAT IS ONEFIT MED?

- Onefit MED is an intuitive, predictable and easy to use scleral lens that allows the practitioner to fully customize the fit. **YOU CONTROL** the design and fit by selecting parameter options for these four fitting zones:
 - Central
 - Mid-peripheral
 - Limbal zones
 - Edge configurations
- With a trial set consisting of 20 lenses, and a very intuitive and comprehensive online calculator, designing and ordering your Onefit MED lenses is extremely straightforward.
- Appropriate for medically indicated corneas, including a wide range of ectasias – moderate to severe, as well as healthy corneas.
- Just like the rest of our Onefit Scleral Lens Platform, Onefit MED optimizes oxygen to the cornea and limbal stem cells, utilizing minimal lens mass and tear lens thickness, for long-term ocular health.

PARAMETERS AVAILABLE

Diameter	15.6mm Standard, 16.0mm and 16.4mm
Sag Height	3800 to 6600 microns (50 microns inc.)
Mid Periphery	-200 to +200 microns (25 microns inc.)
Limbal	-200 to +200 microns (25 microns inc.)
Edge	-200 to +200 microns (25 microns inc.)
Oblate	70 CCR, 110 CCR, 150 CCR
