

Ontolica2010

Search Solution for Microsoft SharePoint

Ontolica 2010

Ontolica 2010 vastly improves search functionality and reporting capability by building on the SharePoint core. The product is easily-deployed and provides more relevant results, search navigation and scalability, as well as extensive reports in easy-to-use web-parts, delivered within the SharePoint security and permissions structure. Ontolica utilizes the core search engine of SharePoint to provide one of the industry's most powerful and scalable search solutions for SharePoint . Combined with a huge variety of reports on portal activity and usage, Ontolica is the strongest offering for a plug-and-play extension for your SharePoint investment.

Whats new in Ontolica 2010?

Ontolica 2010 brings a range of powerful new features to the SharePoint 2007 platform, and provides extensive improvements for SharePoint 2010.

Full Document Preview

Ontolica Preview delivers full document preview functionality to provide end users instant visual guidance without having to download documents. The Ontolica Preview module provides first-page previews, or lets your users dive into documents and see full previews in a visual SharePoint 2010 style without massive additional server overhead, large extra indexes or separate infrastructure. Even on SharePoint 2007.

Social Search Autosuggestion

Auto-Suggest uses stored and analyzed search patterns, delivered by Ontolica Intelligence, to suggest the historical search terms within the department or audience group most likely to match what a given user is looking for. Knowledge and experience is shared effectively and unobtrusively.

Related Searches

Interprets the users' intent to find the best answers to search queries, and suggests corrections to misspellings. This functionality saves end user time and frustration as it provides guidance during the search process.

Search as you Type

Ontolica 2010's "search as you type" functionality dynamically displays results as you type in the search box. This tool allows for immediate access to the powerful Ontolica search experience, without forcing the user to leave the page to get results.

Search Refiners with Result Counts

Ontolica 2010 delivers search refiners with result counts for SharePoint 2007 and SharePoint 2010. This enables increased effectiveness of drill-down faceted search, and when combined with the ability to list either a number range or an exact count, Ontolica 2010 allows users to navigate SharePoint results better than ever before.
