

TOMi™ Says, "Can't Be AOM If You Can't See MEE!"

PhotoniCare's TOMi Scope sees through the eardrum using advanced light-based technology.

Directly Images Middle Ear Fluid

See, don't guess, with the first ever non-invasive view of middle ear fluid. Even in the presence of cerumen!

Quick & Easy to Use

Used like a traditional otoscope with real-time imaging in the middle ear.

Unparalleled Patient Engagement

Bring your patients and caregivers into the picture with an instant on-screen view of the middle ear.

Antibiotic Stewardship

Be a guideline champion by only prescribing Abx when appropriate.

Reimbursement Codes

TOMi can be billed separately using our dedicated CPT codes - can't do that with your otoscope!

TOMi Scope. Turning The Lights On In The Middle Ear.
