# THE PROFOUND UI SUITE

The Native, Comprehensive, and Intuitive Way to Modern IBM i Interfaces

Native

Profound UI is 100% native to the IBM i platform. With Profound UI there is no need to invest in other technologies, like Windows, in order to modernize! Profound UI runs on your Apache server, and doesn't require middleware to run.

Intuitive

The graphical development interface of Profound UI makes it easy to build web and mobile applications using the coding skills you already have. There's no need to learn HTML or CSS. We do that for you!

Comprehensive

The Profound UI suite supports your modernization needs now and for years to come. With one toolset, you can create new web and mobile apps, convert legacy apps, eliminate the ties to 5250, and support new development in PHP or Node.js.

Profound UI is the native, comprehensive & integrated suite of tools for developers who want to:

- Convert legacy RPG and DDS code into modern, Web 2.0 user interfaces

- Create modern IBM i applications using existing RPG or PHP development skills

- Use native IBM i features, like RPG Open Access, to modernize

- Future proof your applications with integrated tools that support your projects now and for years to come
