1615 Stanley Street
New Britain, CT 06050

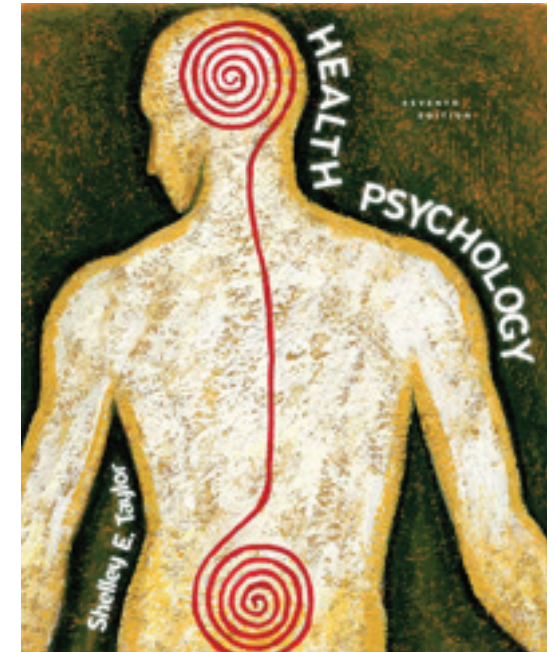

CENTRAL CONNECTICUT STATE UNIVERSITY

MASTER OF ARTS PSYCHOLOGY

A Master's degree in psychology —
the key to a new or more rewarding
career in health and human services or an
important step toward a doctorate.

General Psychology

Highly flexible and tailored to your personal interests, the graduate program in General Psychology can prepare students for a career in the field of human services or for further graduate study.

Community Psychology

The graduate program in community psychology is designed to train students to be active practitioners in prevention and community-based research, enabling them to develop and implement interventions that can prevent the onset of psychological problems such as substance abuse, interpersonal violence, and depression.

Health Psychology

The only program of its kind in New England, the program in health psychology leads students to understand the biological, behavioral, and social factors in health and illness and to develop interventions designed to foster health.

CCSU presents an ideal combination of:

- **Convenience**—scheduling accommodates both full- and part-time students.
- **Solid Foundation and Individual Focus**— Guided by superb faculty advisers you will build a solid foundation in research methodology and develop a personalized program of study.
- **Array of Resources**—Conduct research and enhance your learning in our Laboratory for the Study of Comparative Psychophysics, the Biofeedback Lab, and the Prevention and Counseling Center. CCSU offers internship opportunities at nearby institutions and agencies, including Connecticut Children's Medical Center, the Prudence Crandall Center for Women, the University of Connecticut Health Center, the Whiting Forensic Institute, and the Mercy Halfway House.
- **Excellent Outcomes**—Our graduates pursue doctoral programs at some of the top universities in the nation. They are practitioners who enrich people's lives and well-being.
