challenge >

how can I
streamline my
**design &
production**
workflow?

Flexi All-in-One Solution

SIMPLIFY YOUR PROCESS

SAi Flexi software combines an easy-to-use front-end design interface with a powerful back-end production solution for Print, Cut or Print & Contour Cut applications.

By combining design and RIP capabilities into a single software program, Flexi simplifies your workflow and saves you time.

SAi Flexi comes complete with thousands of drivers for various makes and models of wide-format printers and cutters.

challenge >

how can I
save money
and keep my
software up-to-date?

SAi offers multiple purchase options so there's a Flexi software solution for every budget.

Subscription plans

Low-cost monthly subscription plans fit easily into any size budget. With a subscription plan, you are guaranteed to always have the latest features and upgrades. Plus, you receive free phone or email support for as long as you have your subscription. You can choose to pay monthly or annually for your subscriptions. We offer Flexi or Flexi 365 with our full cadre of design and production features. Or Flexi Design and Flexi 365 Design which only include design tools not RIP capabilities.

Subscription plans for resellers:

We have reseller programs designed around our subscription products that allow you cost-effectively (and profitably) bundle SAI software products with your printers.

Traditional Licenses:

Some businesses prefer to purchase their software as a capital investment rather than an operating expense. Purchase your software license once, and then periodically go for upgrades. 5 price points: Flexi Sign & Print, FlexiPrint, FlexiPrint SE, FlexiSign and FlexiSignSE.

challenge >

how can I
scale up
my business without
over expanding
my capacity?

PLANS FOR EVERYONE

Designer Subscription Plans

SAi offers low-cost month-to-month subscription plans for design-only licenses. With these licenses, you can add additional design stations during peak periods, then cancel them without penalty when demand drops.

Only SAi offers this type of flexibility to expand and contract your design capacity without risk.

challenge >

where can I find
high quality
sign-ready
design elements
that I need?

Sign Design Elements

DESIGN ELEMENTS

Speed up production time to just minutes when you have access to over 6.5 million sign-ready graphics that includes vector illustrations, textures, vinyl-ready files, corporate logos, fonts and vehicle wrap templates. Full Flexi subscribers get five free downloads a month with the ability to purchase more. Access Sign Design Elements through your SAi Cloud window and log in using your SAi Cloud account.

A woman with long dark hair, wearing a patterned blazer, is looking down at a tablet computer she is holding. She is also pointing at her wrist, which has a watch on it. The background is a solid purple color.

challenge >

how can I get customers
to approve jobs
quicker
and increase
my production
workflow?

APPROVAL TOOL

Web-based Artwork Approval Tool

Waiting for customer feedback or design approval slows down your entire production process. SAi developed a time-saving artwork approval solution that your customers will love to use.

Start by easily sending artwork to customers directly from your Flexi software. Your customers automatically receive an email with a link to a webpage where they can easily make notations right on the design and send it back to you with additional revisions.

Once the artwork is approved, you simply send the job to Flexi Production Manager.

This approval workflow is seamless because all customer communication is done within the tool so it's fast and easy for you and your customers.

challenge >

How can I add
more value
to my sign products?

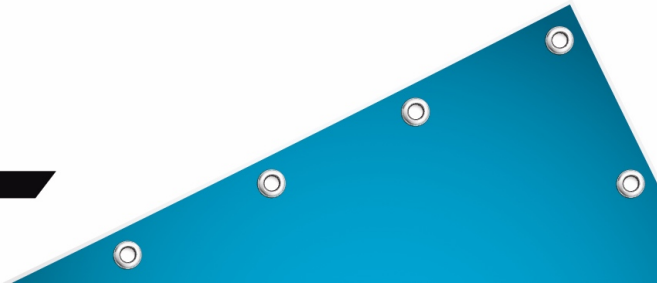

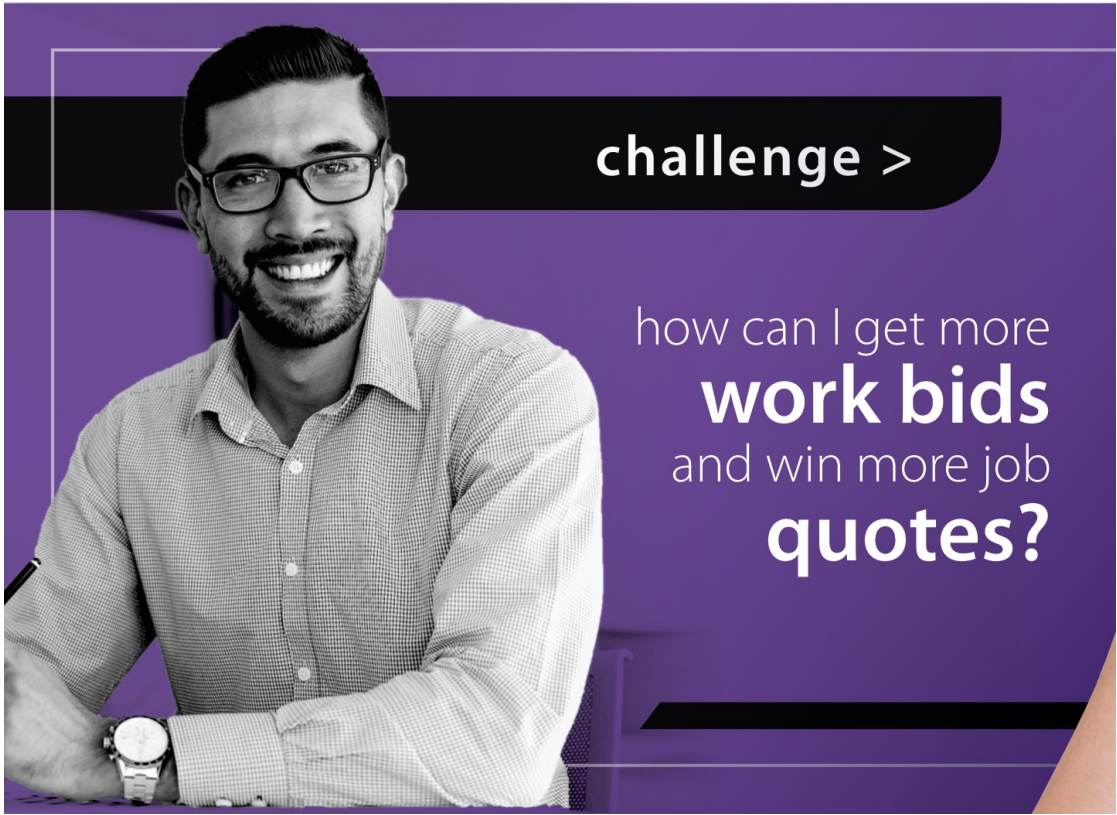

Banner & Canvas Finishing Tools

SIGN TOOLS

Customers are willing to pay more for finishing touches like grommets and hems. Flexi makes it easy to add these components to your banners and signs since all the calculations are done automatically by the software. With just a couple of clicks, you can mark grommet holes, folds, bleeds or stitches. You can make changes just as easily.

Flexi saves you time and adds value to your sign products.

challenge >

how can I get more
work bids
and win more job
quotes?

FINANCIAL GROWTH

To get more work bids, you need more sales time in front of potential customers. You also need a quoting system you can trust in the hands of other employees, so they can sell too.

Flexi Quote Mobile App

Create custom job quotes in seconds while on-the-go, with the free MyFlexi companion mobile app for Flexi. You setup the pricing rules and can see all quotes created from your mobile app or desktop web browser.

challenge >

how can I
economically
expand my sign and
print business?

SAi Box & Display: Powered by Flexi

Open up a whole new and profitable market for customized boxes and POP displays with SAI Box & Display.

Choose from a comprehensive ready-to-use library of display and box templates, includes popular ECMA and FEFCO box templates. Easily resize templates in seconds then use the animated viewer to see your new design in 3D. Works for folding carton, corrugated cardboard and sandwich materials.

SAi Box & Display integrates with Flexi's easy-to-use Designer interface so you can easily add text, logos, ready-made artwork and other design elements.

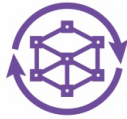

EXPANDING BUSINESS

challenge >

how can I make
more profit
from 2D & 3D signs?

SAi EnRoute for CNC machines

2D & 3D SIGNS

The makers of SAI Flexi bring you this easy-to-use solution for creating custom 2D & 3D signs that are both in demand and profitable. Whether you are creating basic channel letters, v-groove or carved signs or signs with textures and 3 dimensional elements, EnRoute simplifies your sign making workflow. Go from design concept to finished product in less time with EnRoute.

Learning EnRoute is easy thanks to the short movies embedded in the software.

Simply right-click on any of the tools to see an explanatory video.
