

SUMMER RESEARCH

IN LIMERICK, IRELAND

STEM SUMMER RESEARCH

**Are you interested in an
Engineering research placement
this summer? Look no further!**

The University of Limerick is an independent, globally connected university based in the west of Ireland. UL became a university in 1989 and has consistently ranked in the world's top 100 young universities. UL supports research excellence that has a demonstrable impact for communities, economies, society and culture. Six major research and innovation centres have their home on campus and work closely with PhD students, including the Bernal Institute, Iero, HRI and Nexus.

Alongside UL, Learn International is offering research opportunities for Engineering students. This programme is preferable for juniors or sophomores with a strong GPA.

Students will conduct 7.5 hours of research per day for 6 weeks with 3 off-campus days for cultural trips with UL's summer school. To enroll in this programme, students must have a 2.9/3.0 GPA.
