

VIRTUAL STUDY ABROAD

Our online curriculum gives students the chance to practice and learn from the comfort of their own home. We offer a wide variety of group, individual and specialized classes, depending on what works best for each student. Classes are enhanced by access to our Virtual Campus Experience for exercises and activities, as well as video calls with our local professors in both Barcelona and Buenos Aires. All of our classes can be tailored to meet the needs of the students as individuals, or for larger groups. Additionally, we offer online cultural activities that can be added to online programs.
