

How does the Scribe process work?

\$36k

4.5k for 8 months

2. North Star

Our Scribes walk you through the first step of your writing your book, the North Star. They help you perfectly frame your book to ensure it will resonate with an audience and help you achieve your goals.

4. Interviews

Our Scribes will use the Road Map as the guide to interview you and get all of your stories, knowledge and wisdom out of your head and onto a recording.

6. Publishing & Distribution

Our Publishing Team will design a professional book cover, lay the book out, and take care of all the other publishing details that go into making a professional book. Your book will look and feel at home on a bookshelf next to the most famous books out there.

1. Consult with an Author Strategist

The first step, before you begin, is to make sure you have a book in you, and whether or not it makes sense to write it. Note that this is not a sales call; we cannot work with everyone who applies.

3. Outlining

Once the book is properly framed, your Scribe will help you create a Table of Contents and Book "Road Map", that will help you define your ideas and sharpen your thinking. This will lay the foundation for your book.

5. Editing

Our Scribes will turn these recordings into your book. You'll see pages almost from the beginning, and will progressively hone in on the voice and tone. You'll also do a full round of edits with the Scribe, to ensure the book is entirely your idea, in your words and your voice.

7. Marketing

Our basic marketing campaign focuses around an Amazon Best Seller promotion that will ensure your book is seen by thousands of people the week it launches, with the goal of hitting #1 in its category on Amazon. We will also help you launch the book to your friends and community by crafting your emails and launch strategy.
