SERVICE LEARNING PROGRAM

Syracuse Academy, in collaboration with local non-profit organizations, is committed to driving positive change in the lives of migrant communities. Study abroad students take part in projects for unaccompanied minors that range from **arts, music and digital literacy workshops** to **language mentoring** in community centers and public schools

From an academic standpoint, this program provides **experiential learning opportunities** where students apply their knowledge and skills in a multicultural environment and gain an understanding of the complex phenomenon of **migration** in Europe.

Local Partners:

If you are interested in incorporating these experiential learning opportunities into your academic offerings abroad, please contact:
