

Solutions for Database Performance Management

Powerful, Proven Capabilities to Help You Get the Most Out of Your Environment

Your business relies on peak database performance to **meet the application service levels** your customers demand. Unlike most database performance management solutions, Quest delivers integrated, robust functionality and cutting-edge tools to streamline your monitoring and diagnostic activities. Our tools allow you to analyze the root cause of performance conditions and optimize database and application processing to ensure your customers have the best possible experience.

We have more than 20 years of experience in providing innovative solutions that make solving the toughest IT challenges easier. By focusing on our customer requirements and pushing ourselves to identify and provide solutions that are revolutionary and yet simple to use, we are redefining how you monitor, diagnose, analyze and optimize your environments—and ultimately how you manage critical database systems.

Domain Expertise with Cross-Platform Implementations

Our unique performance management solutions provide you with options ranging from smart implementations of standard database management technologies to revolutionary implementations of vendor-supported technologies. Because most companies cannot standardize on a single vendor's technology stack, we offer integrated cross-platform solutions and strive to ensure that the experience of using multiple products together is as simple and seamless as possible. No matter what infrastructure you have, you will find a compelling choice with us.

Feature-Rich Solutions That Exceed Your Expectations

Database performance management and administration evolve rapidly, and our solutions have evolved with them. All of our products are best-of-breed implementations and offer a myriad of built-in integration points. Whatever your business and infrastructure demands, we are confident that our solutions will exceed your expectations. Our top database performance management products—Foglight® for Databases and Foglight® Performance Analysis—are robust products that deliver an extensive and impressive set of features either standalone, or together as part of a complete end-to-end monitoring, diagnostic, analysis and optimization solution.

Foglight® Performance Analysis

"With Performance Analysis we gained a new vantage point on our corporate application—[it] shows us small mistakes that can add up to bottlenecks."

— Jürgen Becker,
Application Developer,
Adecco

"Foglight gives us unparalleled visibility into our application—the visibility we need to find the cause of each performance issue we encounter. What I like most about Foglight is that it does not introduce any appreciable overhead, which could affect our performance test results."

— Stephen Feldman,
Senior Director, Performance Engineering
and Architecture,
Blackboard

Foglight for Databases: *Focus on Monitoring and Diagnosing Database Operations*

- 100 percent remote collection
- Enterprise-class utilities
 - Service discovery
 - Alarm workflow and history
 - End-to-end plug-ins
- Extensive customization capabilities
 - Dashboards
 - Reports
 - Rules, thresholds, automation

Foglight Performance Analysis: *Focus on Analyzing Database Applications*

- Agent-based in-memory collection
- Automated, time-sensitive tools
 - Advisories
 - Baselines
 - Change-tracking
- Revolutionary utilities
 - Quick compare
 - Dimensional drill-down
 - Historical lock analysis

Which Product is Right for You?

The best choice Quest not only because we provide industry-leading tools that transform raw data into useful information, but also because of our account management, consultant, architect and executive resources that work together to ensure our solutions meet your needs. Which Quest product is right for you? Contact us today and let us show you how together we will optimize your database infrastructure.
