

SteelEye® Solution Comparison Table

SteelEye Technology is your source for business continuity solutions that protect applications and data when your IT resources are potentially at risk from planned or unplanned downtime. The SteelEye Protection Suites for custom applications, Exchange, SQL Server and SharePoint as well as stand-alone LifeKeeper™ HA and SteelEye Data Replication solutions have protected the data center for over a decade. SteelEye DataKeeper includes a set of features that complements the basic functionality of the latest Microsoft Windows Server 2008 product. IT organizations now have the ability to replicate their physical or virtual servers to protect and extend their Windows infrastructure for complete failover and disaster recovery. The table below shows how SteelEye DataKeeper complements the SteelEye family of solutions.

	Current		DataKeeper		Microsoft
