

**SupaCMDB** is a Configuration Management Database (CMDB) with integrated Change Management that has been designed based on ITIL principles. You can define a wide variety of Configuration Items (CIs) for maintaining and documenting your infrastructure. The powerful relationship features of **SupaCMDB** allow you to link items together quickly and easily to produce dependency diagrams for effective impact analysis.

The extensible database schema allows you to define any type of Asset, along with attributes you wish to track. The powerful Data Import Wizard can be used to quickly populate the CMDB from Excel, flat file or external RDBMS.

Comprehensive Change Management is built-in, providing multi-level approval and notification for changes affecting your infrastructure.

### SupaCMDB key features:

- ✓ Role-based security
- ✓ Multi-tenancy
- ✓ Active Directory integration
- ✓ Multi time-zone
- ✓ Web Services API
- ✓ Integrated Change Mgmt
- ✓ Extensible schema
- ✓ Auto-discovery integration
- ✓ ITIL Compatible
- ✓ Intuitive interface
- ✓ Modular options

**SupaCMDB** is a 100% web-based application that can be installed on your internal network, or accessed via our secure cloud infrastructure. Visit <http://www.supatools.com> for more information and to register your interest!
