

SupaRELEASE provides a release management platform for complex architectures that consist of multi-component applications and environments.

SupaRELEASE includes functions for defining Work Packages and Environment Bookings, that are used to create Deployments of System Packages to Environments. Powerful Calendars and Reports assist with identification of conflicts and overlaps between application testing and modification, to <u>minimise the risk</u> of unexpected impacts and delays.

Coupled with the powerful relationship features of **SupaCMDB**, dependencies between items can be visualized quickly and easily from any item.

Real-time environment calendars show all activities that are colour coded to distinguish between Pending and Approved Work Orders. Impacted vs. Tested Applications are clearly separated.

		- 3 Months	+ 3 Months	Export	to Excel											
Release	Work Package Type	Work Package	Booking Status	Environment	Phase	2016 Oct		2017 Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Ser
	Infrastructure CMR	Infrastructure CMR (Secondary) - October 2016	Approved	3-DEV												
	Infrastructure CMR	Infrastructure CMR (Primary) - December 2016	Approved	3-DEV												
	Project	Data Services	Approved	1-Production												
	Project	IMR Replatform - Phase 3.1	Pending	1-Production	3 UAT											
	Project	IMR Replatform - Phase 3.1	Pending	1-Production	8 Implementation											
	Project	IMR Replatform - Phase 3.1	Pending	1-Production	8 Implementation											
	Project	⊞IMR Replatform - Phase 3.2	Pending	1-Production	8 Implementation											
	Project	⊞Data Services	Approved	1-Training and Testing												
	Project	Write Back Onboarding	Pending	1-Training and Testing												
	Project	Data Services	Approved	2-TSA												
	Project	■CSRP Pbs Release 1.1b	Pending	2-TSA	3 UAT											
	Project	#IMR Replatform - Phase 1	Approved	2-TSA	7 Performance											
	Project	IMR Replatform - Phase 1	Approved	2-TSA	5 OAT											
	Project	⊞IMR Replatform - Phase 1	Approved	2-TSA	3 UAT											
	Project	IMR Replatform Integration - 2.0	Approved	2-TSA	6 Regresssion											
	Project	■IMR Replatform Integration - 2.0	Approved	2-TSA	5 OAT											
	Project	⊞IMR Replatform Integration - 2.0	Approved	2-TSA	7 Performance											
	Project	IMR Replatform - Phase 3.2	Pending	2-TSA	1 System Test											
	Project	IMR Replatform Integration - 2.2	Pending	2-TSA	6 Regresssion											
	Project	IMR Replatform - Phase 3.2	Pending	2-TSA	3 UAT											

SupaRELEASE supports definition of:

- Work Packages
- Entry Points
- Deployment Points
- Environments
- People

- Environment Bookings
 - Technology Instances
- System Components
- System Packages
- Deployments
- Applications
- Services
- Locations

SupaRELEASE is a 100% web-based application that can be installed on your internal network, or accessed via our secure cloud infrastructure. Visit http://www.supatools.com for more information and to register your interest!
