About Syncfusion

Founded by industry experts in 2001, Syncfusion, Inc. provides the broadest range of enterprise-class software components and tools for the Microsoft .NET platform.

With Syncfusion, developers can move beyond simply coding applications to delivering real business innovation – the elegant user interfaces, business intelligence dashboards, and sophisticated reporting that today’s business users need, in the formats they demand. Our award-winning .NET components and controls are designed to meet your evolving development needs, whether you’re working in Windows Forms, WPF, ASP.NET, ASP.NET MVC, or Silverlight.

At Syncfusion, we uncompromisingly strive for excellence in order to offer the very best value to our customers – from small ISVs, to global IT consultancies and Fortune 100 companies.

.NET components for enterprise-class applications

Working with Syncfusion Essential Studio, you can quickly and easily add cutting-edge functionality and the very latest look and feel to your Microsoft .NET applications, taking the grunt work out of the development cycle and freeing you to focus on the core business logic of your applications.

Syncfusion is a true partner in our customers’ development efforts, enabling extensive customization and delivering round-the-clock support. Syncfusion remains active in the development community by maintaining Syncfusion FAQs, a valuable resource for the Microsoft development community, and actively supporting regional .NET user groups.

The Syncfusion advantage

- ✓ **Built with the future in mind:** Our products are geared toward long life-cycle applications and are architected to meet high standards for flexibility and maintainability. We provide comprehensive support for the latest technologies, including Visual Studio 2010 and .NET 4, as well as JQuery, AJAX, and SharePoint.
- ✓ **Full source code:** We believe in empowering developers with source code; ours is written to be redistributed and shipped in a tightly integrated manner – use our components in debug mode at the flick of a switch.
- ✓ **First-rate technical support:** Online, phone, and forum-based support ensure that you'll get the answers you need, when you need them. Our Direct-Trac support system is available 24x7, providing easy access to your complete incident history. Each license includes a one-year subscription for support and product updates – and unlike other vendors, we don't charge extra for phone support!
- ✓ **Straightforward, flexible licensing:** Syncfusion components are licensed on a simple per-developer basis with no royalties, run-time, or server-deployment fees. Each licensed developer may install on multiple personal machines.
- ✓ **A viable base for standardization:** The wide range of solid products in our suites allows our customers to reduce their dependence on multiple vendors and streamline their toolkits.

What Syncfusion customers say

We've been using the Syncfusion controls, Essential Studio Enterprise, for many years (since 2004), and we've found them extremely useful – in fact, we'll go so far as to say they're essential! The suite includes controls for Windows Forms, ASP.NET, WPF, Silverlight, and other controls that allow you to create native PDF files, Word and Excel documents, and so much more – in fact, it's one of the few suites that gives you all this functionality at such a great price. Source code is also available, should you need it as well.

James Burns [UK] Review: ★★★★★ on ComponentSource

Syncfusion helps us to achieve our aggressive development timescales and provides excellent support when we need it. Our key business users at a top global bank were actually speechless when they saw the level of functionality that we have created over the past few months with Syncfusion.

Rohan Bethune, Senior Consultant, Hatstand Limited

We have been using Syncfusion tools for three years. There are several things we look for when selecting third-party controls. They have to be lightweight, work well with update panels, and they must have a great support program. We have found Syncfusion to have all of these traits. I recommend Syncfusion tools to anyone.

ronr [USA] Review: ★★★★★ on ComponentSource

The Syncfusion grid is at least three times faster when expanding and 10 times faster when collapsing (using large data sets) than the solution we were previously using. Your support is the best that I have found, and as a developer I really appreciate this. Keep your excellent service – this made my buying decision that much easier.

Chris Wescott, Log Tech Canada, Ltd.

Component suites tailored to your needs

Essential Studio Enterprise Edition

Essential Studio Enterprise Edition provides the most comprehensive suite of components and controls for .NET, comprising *all* the tools and libraries that are part of Essential Studio User Interface Edition, Reporting Edition, and Business Intelligence edition, including the fastest high-performance WPF Grid on the market, and the first 100% RDL-compatible WPF and Silverlight report viewer. This is the one package you need for developing in Windows Forms, WPF, ASP.NET, ASP.NET MVC, or Silverlight.

Essential Studio User Interface Edition

Essential Studio User Interface Edition includes everything you need to build industry-standard user interfaces. This studio lets you quickly and easily build enterprise-class desktop and Web applications with docking managers, Microsoft Office-style controls, menus, business charts, Visio-like diagramming, the fastest .NET grid control on the market, and much more. You can design Web applications using over 60 AJAX-enabled controls or frameworks with complete documentation and samples and easily add advanced jQuery UI features to your Web applications. This suite includes high-performance Grid, Docking and Menu frameworks, data-binding controls, Scheduler, Data Visualization Chart, Gauge, Diagram, and more for any .NET platform: Windows Forms, WPF, ASP.NET, ASP.NET MVC, or Silverlight.

Essential Studio Reporting Edition

Provide business users with the reports they need, in the formats they prefer. Essential Studio Reporting Edition provides .NET components to read and write Excel, Word, and PDF documents and enables your applications to be over 100x faster than office automation. Create advanced reports or integrate document-based reporting into your Windows and Web applications easily. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential Studio Business Intelligence Edition

Integrate BI analysis into your Windows and Web applications with ease. With Essential Studio Business Intelligence Edition, you can easily build WPF, Silverlight, and ASP.NET business intelligence applications. Creating executive dashboards for the most demanding users is painless with Syncfusion BI Client, Chart, Gauge, and Grid. Works with both OLAP data and relational data.

The one package you need for developing in Windows Forms, WPF, ASP.NET, ASP.NET MVC, or Silverlight

Essential Studio Enterprise Edition

Includes all Syncfusion products for all supported platforms.

Syncfusion components

Essential Grid – A fully customizable, industry-standard, high-performance grid control with an extensive Excel-like feature set and outstanding performance. Supports extremely detailed customization down to the cell level. Numerous cell types and unmatched extensibility. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential Tools – A collection of professional-class user interface controls with complete support for the Office 2007 look and feel. Docking windows, customizable menus, complete support for themes, localization, and much more. Available for Windows Forms, WPF, ASP.NET MVC, ASP.NET, and Silverlight.

Essential Chart – A business-oriented charting component offering an innovative data object model that makes it easy to populate a chart with any kind of data source. Features advanced styles architecture. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential Diagram – An extensible, high-performance .NET diagramming framework that can be used for developing Microsoft Visio-like interactive graphics and diagramming applications. Available for Windows Forms, WPF, ASP.NET, and Silverlight.

Essential Edit – A syntax-highlighting edit control designed to be extensible and easy to use. Supports automatic outlining, multilevel undo-redo, rich formatting options, and easy configuration. Available for Windows Forms and WPF.

Essential HTMLUI – A Windows Forms control that renders Hypertext Markup Language (HTML). With functionality similar to a Web browser, it is used primarily for display. Available for Window Forms.

Essential Schedule – A UI control library available as part of Essential Studio User Interface Edition. This component lets you add Outlook-like scheduling support to your applications. Available for WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential Gauge – The Syncfusion WPF Gauge library allows you to use XAML and C# to draw circular gauge designs. The gauge control comes with sophisticated customization support that provides endless possibilities for control modification. With Essential Gauge, users can concisely display several data points or data ranges in a compact area. Data given in a control can be easily depicted and quickly understood by users of any level. Available for WPF, ASP.NET MVC, and Silverlight.

Essential XlsIO – Read and write Microsoft Excel files with this library, which can be used on systems that do not have Microsoft Excel installed. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential DocIO – A .NET library that can read and write Microsoft Word files. Features a full-fledged object model and can be used on systems that do not have Microsoft Word installed. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Essential Grouping – A high-performance, extensible grouping engine that can group any list of data and handle large amounts of dynamic data. Supports related data and filters. Available for Windows Forms, WPF, ASP.NET, and ASP.NET MVC.

Essential Calculate – Add calculation support to your business objects and easily set up forms that have calculation dependencies among various controls. Supports cross-sheet references and includes a function library with over 150 commonly used formulas. Available for Windows Forms, WPF, ASP.NET, and ASP.NET MVC.

Essential PDF – A .NET library that allows you to produce and modify Adobe PDF files. It features a full-fledged object model, allowing for the easy creation and modification of PDF files from any .NET language. It has no dependency on any external library, and is built from the ground up using C#. Available for Windows Forms, WPF, ASP.NET, ASP.NET MVC, and Silverlight.

Plan for the long term: standardize on Syncfusion components

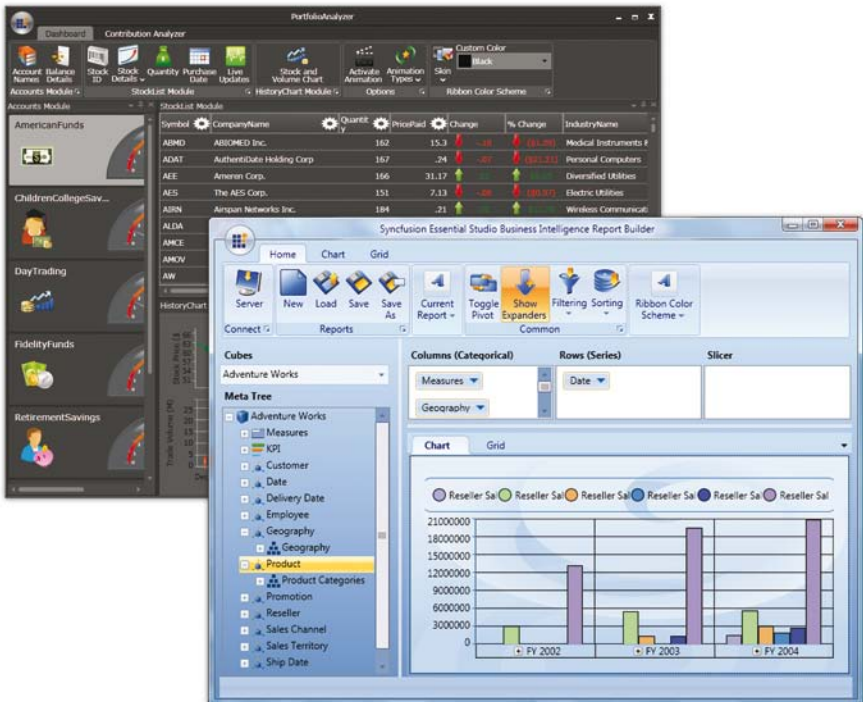

With the release of Visual Studio 2010 and .NET 4, the component market is more vibrant than ever. Some vendors offer a wide variety of products, while others target a niche. While both approaches have their place, there are pitfalls associated with accumulating components from several vendors including multiple licensing policies to keep track of, high administrative, overhead, and varying levels of support.

Syncfusion has earned a rock-solid reputation in the component space by offering developers a different path – the opportunity to cover all their development needs with one vendor. With a comprehensive line of high-performance, solidly built components, Syncfusion strives to truly partner with its customers by backing its products with straightforward licensing, an extensive track record, and a strong technical support infrastructure that appreciates how developers work – after all, we're developers too!

Thinking about standardization? Think about Syncfusion.

Consider the benefits of having only one vendor to contact for technical support, updates, and licensing.

One package. One vendor. One license. One great price.

We'd love to hear from you
