

Training Schedule

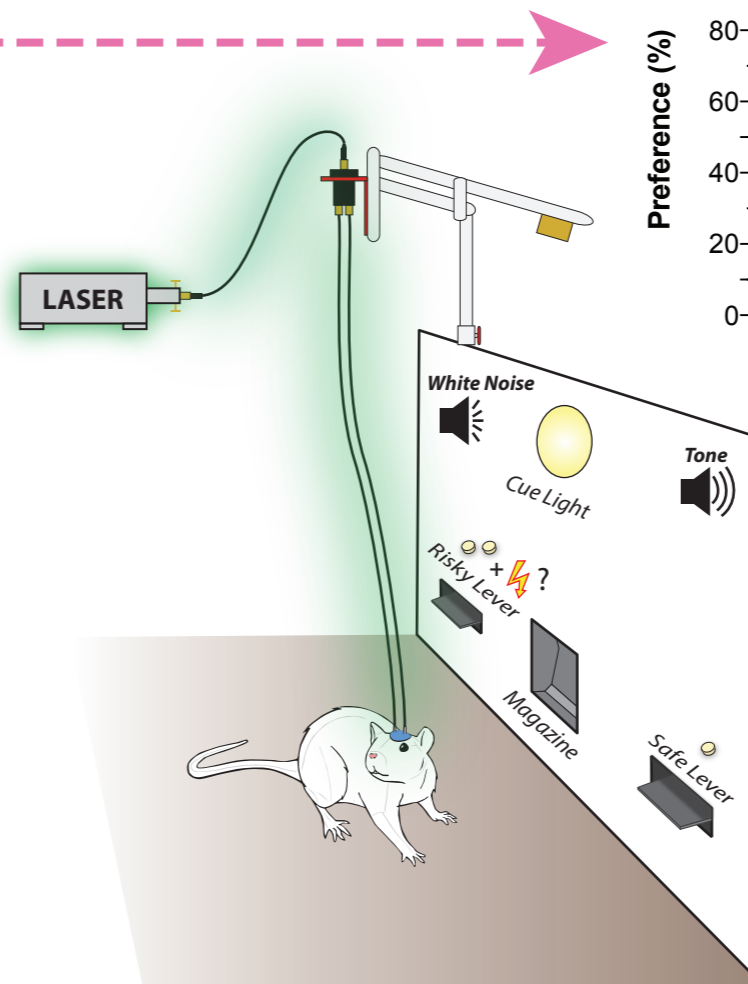

Estrous Sampling

Task Progression

Task order was counterbalanced across all rats and repeated twice.

1. Pre - **inhibition** from "Deliberation" until lever choice (4 - 14 sec)
2. RWIN - **inhibition** during "Risky Win" outcome (4 sec)
3. RLOSS - **inhibition** during "Risky Loss" outcome (4 sec)
4. Safe - **inhibition** during "Safe" outcome (4 sec)
5. ITI - **inhibition** between trials (8 sec)

Shock and training was adjusted so animals fit within this range of acceptable preferences
