

THREE MINUTE REVIEW

... XPERIO UV™ ...

Maximum UV Protection

Eye-Sun Protection Factor (E-SPF®) 50+

100% frontside UV protection

98.5% backside UV protection*

**Others give only 50% backside protection*

Maximum Scratch Resistance

Outdoor eyewear withstands rough handling

Up to **3X** more scratch resistance
than competitor lenses

Maximum Cleanability

Super hydrophobic coating, included

NONE of the competitor lenses even
address ease of cleaning

Clearest, Sharpest Vision

Eliminates distracting glare (ghost images)

Provides **7X** more comfort than a polarized
lens without backside no-glare treatment

What's wrong with the polarized lenses I'm prescribing now?

A regular polarized lens does not have the same level of **UV Protection, Cleanability, Scratch-Resistance, and Sharpness of Vision** offered by **Xperio UV™** lenses.

**When compared to standard anti-reflective coating
on the backside of a polarized lens*
